[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: The TRIDENT II (D5) missiles will be carried on OHIO CLASS Fleet Ballistic Missile Submarines through 2042. The D5 Life Extension (D5LE) program will ensure that the United States continues to maintain a highly survivable strategic deterrent well into the 21st century. The TRIDENT II missile (1) enhances Fleet Ballistic Missile Submarine survivability as it increases the Sea Launched Ballistic Missile range at full payload to exploit the total patrol area available to the TRIDENT submarine, (2) minimizes total weapon system costs as it has increased the Sea Launched Ballistic Missile payload to the level permitted by the size of the TRIDENT submarine launch tube, thereby allowing mission capability to be achieved with fewer submarines, and (3) has added an efficient hard target kill capability to the Sea Launched Ballistic Missile. Funding in the TRIDENT II Mods line is required to continue the procurement of TRIDENT II missiles and currently supports the Life-Extension of the D5 missile.

MDAP/MAIS Code(s): 178		
<p>Justification: The FY 2014 request of \$1,140.9 million includes \$460.4 million for program and production support costs (including but not limited to costs associated with flight test instrumentation, additional reentry system hardware and D5 Solid Rocket Motors (SRM) and Post Boost Control System (PBCS)), \$666.4 million for the D5LE program, and \$14.1M for New Strategic Arms Reduction Treaty (New START) Implementation.</p> <p>Program and production support cost drivers include Warhead Components, Tooling, Test and Support Equipment, Supportability Mods/Strategic Programs Alteration (SPALT) Insertion, SRM and PBCS, and Guidance Hardware.</p> <p>Warhead Component (cost element 2.3) funding supports the production of the W76-1/Mk4A Reentry Body sssembly and associated support equipment including Reentry Body cabling and Reentry Body Shells.</p> <p>Tooling, Test and Support Equipment (cost element 2.5) funding supports the refresh and/or replacement of D5 Strategic Weapons System support equipment and addresses design deficiencies identified during maintenance or Service Life Evaluation (SLE) Testing. Refreshes scheduled for FY2014 include but are not limited to the following: Linear Ordnance Test Console (LOS), Dockside Test Console (DTC), Missile Test Readiness Equipment (MTRE), Low Voltage Initiator Squib/Gas Cartridge Test Console (LVISGC TC) and Fire Control and Electronics Assembly Test Console (FCEA TC).</p> <p>Supportability Mod's/SPALT Insertion (cost element 2.8) funding supports the incremental replacement of aging Test/Evaluation equipment experiencing obsolescence as well as installation costs for missile SPALT's including alterations to igniters, equipment sections, re-entry bodies and motor ancillary equipment.</p> <p>Solid Rocket Motor and Post Boost Control System (cost element 2.12) provides for SRM, PBCS, and all associated costs including production requalification, HMX procurement, tooling, Railcar Support and Production Evaluation Test/Static Fire. Funding varies within this cost element to decreases/increases in SRM unit costs and any changes in associated costs listed above. SRM unit costs in FY 2014 and out have been lowered as the Navy has actively engaged with Lockheed Martin and Alliant Technical Systems Inc. to aggressively lower their respective overheads as the industrial base begins to decline.</p> <p>Guidance Hardware (cost element 3.4) includes costs for a complete Guidance System consisting of an Inertial Measurement Unit (IMU) and Electronics Assembly (EA). Within the IMU and EA there are numerous sub-components which are included in this cost element. Other critical components included in cost element 3.4 include Guidance Circuit Card Assemblies (CCA), Guidance Accelerometer Sensors (PIGA), Interferometric Fiber Optic Gyros (IFOG), Detector Package Assemblies (DPA) and Mk6 LE Electronic Part Sets.</p> <p>The D5LE program funding in FY 2014 supports the redesign of the guidance system and missile electronics, which must be replaced to support the extended service life. Funding was added in FY14 through the outyears for the D5LE Program restrucure. In FY 2009, the D5LE program experienced a cost and schedule overrun in the redesign of Missile Electronics SPALT's. Missile SPALT Kit procurement was delayed until FY 2011 in order to conduct an additional design iteration which was required to achieve system Critical Design Review. The restructured program shifted IOC from FY 2013 to FY 2017. Funding in FY 2014 also procures missile electronic and guidance SPALT kits as well as other critical components required to support the extended SSBN hull life for a 14 SSBN TRIDENT II program.</p> <p>Funding in cost elements 4.1 through 4.7 support the Strategic Arms Reduction Treaty (New START) signed into law on 5 Feburary 2011. New START is a nuclear arms reduction treaty between the United States and the Russian Federation which limits the number of deployed launchers. Funding in FY14 will procure additional support equipment required to support safe offload processing of missiles and warheads in support of the New START requirements. Support equipment procurement will consist of Bare Missile Bridges and 1st and 2nd Stage Motor Chocks. New START funding will also be used in support of transportation and storage equipment.</p> <p>Since PB13, SSP has worked with our industry partners to reduce overhead costs and minimize cost increases to the department. As reflected in the P40A, SSP currently estimates the unit cost of a Solid Rocket Motor (SRM) to be lower then previously anticipated. Despite efforts to reduce overhead costs, the industrial base remains volatile. Potential future unit cost increases due to further decline in the SRM industrial base could impact the D5LE Program.</p>

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

Funding for Missile Industrial Facilities provides for capital maintenance projects at Navy-owned Naval Industrial Reserve Ordnance Plants (NIROPS) at Sunnyvale and Santa Cruz, California, and Bacchus, Utah, in support of the Fleet Ballistic Missile program. The Bacchus, Utah, ATK facility alone consists of 583 acres, over 130 buildings and over 13 miles of road. The Sunnyvale, California facility consists of 49 acres of land and 10 buildings and the Santa Cruz, California facility consists of 271 acres of land and 29 buildings.

Item Schedule		ID CD	Prior Years			FY 2012			FY 2013			FY 2014 Base			FY 2014 OCO			FY 2014 Total

Total Gross/Weapon System Cost					0.000			3.492			5.553			7.617			-			7.617

*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

As NIROP buildings are vital to D5 motor production, they must be maintained in an operational state until the D5 retirement. Most buildings are already over 50 years old and have exceeded their useful life. Safety related maintenance projects were originally deferred when the Department did not have a program of record to remotor the D5 missile to support its extended deployment. Subsequently, the Department has approved and funded the re-motoring of D5. Because of this significant extension of motor procurement into the future, additional repairs and upgrades are necessary to ensure NIROP

MDAP/MAIS Code(s): buildings are properly maintained. Incidents that highlight the need for additional funds include: a boiler failure; a fan belt seizing in an air handler; and a fire main failure at the Bacchus facility that halted nitro glycerin production, a key ingredient in our Solid Rocket Motor (SRM) propellant. Projects planned in FY 2014 include modifications and rehabilitation of civil works, non-severable equipment, and real property. Among these projects are replacements of heating and air conditioning systems, chiller and boiler replacements, roof replacements, upgrades and improvements to building electrical systems and facilities maintenance.

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description: Tomahawk provides an attack capability against fixed and mobile/moving targets, and can be launched from both surface ships (RGM) and submarines (UGM). Tomahawk consists of the following variants: (1) UGM -109A, Land Attack Nuclear; (2) RGM/UGM-109C, Land Attack Conventional; (3) RGM/UGM-109D, Land Attack Submunition Dispenser; (4) RGM/UGM-109E, Tactical Tomahawk.</p> <p>The Block IV Tactical Tomahawk (TACTOM RMG/UGM-109E) preserves Tomahawk's long-range precision-strike capability while significantly increasing responsiveness and flexibility. TACTOM improvements include in-flight retargeting, the ability to loiter over the battlefield, in-flight missile health and status monitoring, and battle damage indication imagery, providing a digital look-down "snapshot" of the battlefield via a satellite data link. Other Tomahawk improvements include rapid mission planning and execution via Global Positioning System (GPS) onboard the launch platform and improved anti-jam GPS.</p> <p>Characteristics and dimensions (approximate): Contractor: Raytheon Missiles Systems Company Weight (with booster and capsule) (UGM-109): 4,300 pounds Weight (with booster and canister) (RGM-109): 4,300 pounds Length (with booster): 20.5 feet Wing Span: 8.6 feet Cruise Speed: High Subsonic</p>

<p>*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.</p> <p>Justification: Production of the Tactical Tomahawk missile began with Low Rate Initial Production (LRIP) buys of 25 missiles (LRIP I) in FY02 and 377 missiles (167 LRIP II and 210 LRIP III) in FY03. LRIP I completed delivery in December 2004. LRIP II completed delivery in August 2005. Full rate production contract was awarded FY04. FY04-FY08 unit costs based on multi-year procurement (MYP) contract. The FY04 Authorization and Appropriations Act authorized the Navy to pursue a MYP contract. FY04 supported economic order quantity (EOQ) procurements for the MYP. FY08 funding procured 394 missiles under the MYP contract. FY08 Other Contingency Operations (OCO) funding procured 102 missiles under the MYP contract. FY09 missile production supported the procurement of 207 missiles under an annual buy contract awarded on 31 March 2009. FY10-18 funding supports the procurement of 196 BLK IV missiles per fiscal year, utilizing an annualized firm fixed price procurement strategy. A revised Acquisition Program Baseline (APB) has been approved to accommodate additional missile procurements thru FY20.</p> <p>Additional FY11 funding has been received through OMNIBUS reprogramming action DOD Serial Number FY 11-21-R PA signed 9/13/2011 to replenish the 221 Tomahawk missiles expended in Operation Odyssey Dawn. These additional quantities were awarded on the FY12 FRP 9 procurement contract. Due to limitations on the quantity of Capsule Launch System (CLS) that can be procured in FY12, 56 of the FY12 funded missiles were awarded on the FY13 FRP 10 procurement contract.</p> <p>In addition to the procurement of TACTOM missiles, funding also supports hardware obsolescence/product improvement and also incorporates engineering change proposals into the Tomahawk Weapon System (TWS) to meet existing requirements, keep pace with evolving threats, and to ensure continued weapons system viability. Product Improvement lines were restored in FY12 through FY18 for incorporation of Engineering Change Proposals into the missile and ancillary equipment configurations. This change was made in order to resource activities necessary to keep pace with evolving threats to the missile system and to ensure continued weapons system viability. Initial efforts are associated with communication upgrades to enable missile communications in non-permissive environments.</p>

P-5 Remarks: Footnotes: (1) Additional FY11 funds received through OMNIBUS reprogramming action DOD Serial Number FY11-21-R PA signed 9/13/2011. Funding was provided to replenish combat expenditures of Tomahawk missiles (quantity of 221) used in support of Operation Odyssey Dawn. The additional quantity of 221 was procured on the FY12 procurement contract (FRP9). The FY12 (FRP9) limited the maximum quantity of Capsule Launch System (CLS) that could be procured in FY12. The CLS maximum quantity was 123 (115 was procured using FY11 Omnibus funding and 8 was procured using FY12 funding). The remaining FY12 CLS quantity of 56 were procured on the FY13 contract option of FRP10. The FY13 CLS unit cost was contingent upon the award of 56 FY12 funded and 64 FY13 funded CLS All-Up-Rounds (AURs). Unit prices for the FY14 VLS/CLS variants are based upon the FY13 contract negotiated price point at the lower 196 minimum sustaining rate procurement quantity. This unit price is escalated using the current escalation index and an adjustment to reflect current Forward Price Rate Agreement. FY14 Capsule unit cost increase compared to FY13 Capsule unit cost is higher due to loss of rate affect savings associated with decrease in procurement quantity from 120 to 64. (2) The increased production rate associated with the procurement of the additional 221 AURs has accelerated existing component obsolescence issues. Obsolescence cost increases include the costs to address obsolete Satellite Data Link Terminal components and the Range Safety System Pulse Code Modulator. This line also includes cost associated with managing diminishing manufacturing sources including Williams Engine and a supplier base that is being increasingly pressurized by production rates at minimum sustaining rate. FY11, FY12 and FY13 Contract savings on the FRP 9 and FRP 10 production contracts have been applied to resourcing obsolescence and product improvement efforts. (3) Product Improvement lines in FY12 through FY18 are for the incorporation of Engineering Change Proposals into the missile and ancillary equipment configurations. This change was made in order to resource activities necessary to keep pace with evolving threats to the missile system and to ensure continued weapons system viability. Initial efforts are associated with communication upgrades to enable missile communications in non-permissive environments. FY11, FY12 and FY13 Contract savings on the FRP 9 and FRP 10 production contracts have been applied to resourcing obsolescence and product improvement efforts.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

⁽⁶⁾ The additional FY11 funded procurement of 221 Tomahawks was added to the FRP9 contract. The FY12 procurement contract (FRP9) limited the maximum quantity of Capsule Launch System (CLS) that could be procured in FY12. The CLS maximum quantity was 123 (115 were procured using FY11 Omnibus funding and 8 were procured using FY12 funding). The remaining FY12 CLS quantity of 56 were procured in December 2012 on FRP10. Due to PDOCs limitations, only 24 months of the delivery schedule is reflected. The remaining 25 CLS will be delivered 10 in June 14, 13 in July 14 and 2 in August 14.

⁽⁷⁾ Delivery schedule updated to reflect the missiles procured in the FY13 option that are funded with FY12 WPN will deliver first.

⁽⁸⁾ The MK45 Capsules, procured as GFE to support the CLS variant, and the MK14 Canisters, procured as GFE to support the VLS variant, are independently contracted with delivery schedules to support the TACTOM AUR production contract. Delivery schedules for the MK45s and MK14s to the Government are designed to meet the GFE requirements the Government has in the TACTOM AUR production contract. FY11 variance in deliveries is the result of a onetime efficiency between the prime contractor and sub vendors resulting in reduced PLT for FY11 MK45s. Due to PDOCs limitations, only 24 months of the delivery schedule is reflected. The remaining 55 MK45s will be delivered 10 per month (January 14 through April 14), 13 in May 14 and the remaining 2 in June 14.

⁽⁹⁾ The majority of the FY12 CCLS' are going to be procured on the FY13 option year (with the exception of 8 that are on the FY12 contract with the FY11 Operation Odyssey Dawn (OOD) missiles). The 8 CCLS' procured in FY12 will deliver at the end of the delivery period after the 115 FY11 OOD CCLS'. The remainder of the FY12 will deliver at the beginning of the FY13 delivery period.

⁽¹⁰⁾ Production rates are based on canister contract constraints, the maximum production rate for FY09 was 153, FY10 was 132, FY11 was 238, and FY12-FY18 is 132.

⁽¹¹⁾ Delivery schedule updated to reflect the MK14 canisters procured with the FY11 OOD will deliver first before the MK14 canisters procured with FY12 WPN.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: The Advanced Medium Range Air-to-Air Missile (AMRAAM) is the premier all-weather, all-environment radar guided missile developed jointly by the Air Force and Navy. The Air Force is the lead service. AMRAAM is small, fast, light, and has improved capabilities against very low-altitude and high-altitude targets in an electronic attack (EA) environment as compared to previously fielded radar guided missiles. The Defense Acquisition Board approved AMRAAM Full Rate Production (Milestone IIIB) in April 1992. The latest version, AIM-120D, completed Engineering and Manufacturing Development (EMD) Sep 09. Procurement of limited quantities to support Air Force and Navy operational test and Initial Operational Capability (IOC) requirements began in FY06. The AIM-120D provides improved performance from GPS-aided navigation, a two way data link to enhance aircrew survivability and network compatibility, and new guidance software which improves kinematic and weapon effectiveness performance.

P-5 Remarks: Footnotes: (1) Unit Cost calculations based on 200 C-7 FMS missiles per year in FY14-FY17 and 250 in FY18 (2) FY13-17 DMS costs include obsolescence and loss of manufacturing sources for 9 Custom Application Specific Integrated Circuits (ASICs) and 5 unique commercial processor types. (3) Program decision to reduce ECO to approximately .5% of missile cost annually beginning in FY12. (4) Containers are required to maintain pace with quantities, ensure the updated in-container reprogramming capability continues and replace outdated/damaged containers.

‡ Delivery rows marked with the ♦ symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

(8) FY09 deliveries have been delayed due to rocket motor technical issues.

(9) FY10 deliveries have been delayed due to rocket motor technical issues. AF begins delivery in Feb 2012 with a total quantity of 170 in FY10

(10) FY11 deliveries have been delayed due to rocket motor technical issues. AF begins delivery of 178 missiles in February 2014 /FMS begins delivery of 203 missiles in March 2014

(11) AF and FMS begin delivery in Feb 2014. AF quantity - 33/FMS quantity - 225

(12) AF deliveries begin in February 2014. CATM quantity - 79

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

The AIM-9X Sidewinder short-range air-to-air missile is a long term evolution of the AIM-9 series of fielded missiles. The AIM-9X missile program provides a launch and leave, air combat munition that uses passive infrared (IR) energy for acquisition and tracking of enemy aircraft and complements the Advanced Medium Range Air-to-Air missile (AMRAAM). Air superiority in the short-range air-to-air missile arena is essential and includes first shot, first kill opportunity against an enemy employing IR countermeasures. The AIM-9X employs several components common with the AIM-9M (fuze, rocket motor and warhead). Anti-Tamper features have been incorporated to protect improvements inherent in this design.

MDAP/MAIS Code(s): 289,442,581																																																
<p>AIM-9X is a Post Milestone III, Acquisition Category IC (ACAT-IC) joint service program with Navy lead. In June 2011, the Milestone Decision Authority (MDA) established the AIM-9X Block II missile program which was approved for entry at Milestone C for Low Rate Initial Production (LRIP). The 2366 A/B certification and Acquisition Program Baseline for AIM-9X Block II was signed December 23, 2011, and the Block I program was terminated.</p> <p>FY12 provides funding to procure the 2nd lot of Low Rate Initial Production AIM-9X Block II missiles. FY13 provides funding to procure the 3rd lot of Low Rate Initial Production AIM-9X Block II missiles. FY14 provides funding to procure the 1st lot of Full Rate Production AIM-9X missiles.</p> <p>The Block II LRIP-1 (Lot 11) contract was awarded in September 2011, and the LRIP-2 (Lot 12) was awarded in December 2011. The program recently received MDA approval to award LRIP-3 in FY 2013. Pending successful initial operational test and evaluation results, the program will enter Full Rate Production (FRP) in FY 2014 and beyond.</p> <p>Total Program quantity by service: The US Navy will procure 3,937 total missiles under this Budget Line Item: 1,289 Block I missiles and 2,648 Block II missiles. In addition, the US Navy procured 63 Block I missiles in FY 2001 under the AIM-9M Modification program. The US Air Force will procure 5,030 total missiles under this Budget Line Item: 1,678 Block I missiles and 3,352 Block II missiles. In addition, the US Air Force procured 67 Block I missiles in FY 2001 under the AIM-9M Modification program.</p> <p>Program Status: All AIM-9X Block I Production units have been delivered to the government ahead of the contracted schedule. Totals include funding for Program Number 581, Tactical Air Intercept/AIM-9X Block I, as well as Program Number 442, Tactical Air Intercept/AIM-9X Block II.</p> <p>The table below summarizes all AIM-9X Block II missiles procured by the program office (Navy, Air Force and FMS)</p> <table border="1" style="width:100%; border-collapse: collapse;"> <thead> <tr> <th>BLI</th> <th>Service</th> <th>FY12</th> <th>FY13</th> <th>FY14</th> <th>FY15</th> <th>FY16</th> <th>FY17</th> <th>FY18</th> </tr> </thead> <tbody> <tr> <td>220900</td> <td>USN</td> <td>69</td> <td>150</td> <td>225</td> <td>225</td> <td>225</td> <td>226</td> <td>225</td> </tr> <tr> <td>347900</td> <td>USAF</td> <td>127</td> <td>164</td> <td>225</td> <td>243</td> <td>243</td> <td>244</td> <td>204</td> </tr> <tr> <td>Other</td> <td>FMS*</td> <td>173</td> <td colspan="7">* FMS quantities are based on signed Letters of Offer and Acceptance between the US Government and the Foreign Governments.</td> </tr> <tr> <td>Total</td> <td></td> <td>369</td> <td>314</td> <td>450</td> <td>468</td> <td>468</td> <td>470</td> <td>429</td> </tr> </tbody> </table> <p>The FY12 unit costs include one-time cost savings associated with combining the FY11 (LRIP 1) and the FY12 (LRIP 2) production materials into one large economy of scale buy. In addition, the production schedule has been truncated into a 16 month integrated production build schedule (8 months for the FY11 production run and 8 months for the FY12 production run) effectively eliminating 8 months of overhead. FY13 and future production lots will be stand alone efforts.</p>			BLI	Service	FY12	FY13	FY14	FY15	FY16	FY17	FY18	220900	USN	69	150	225	225	225	226	225	347900	USAF	127	164	225	243	243	244	204	Other	FMS*	173	* FMS quantities are based on signed Letters of Offer and Acceptance between the US Government and the Foreign Governments. Gross Weapon System Cost				61.409			50.198			80.226			117.208			-			117.208
P-5 Remarks: Footnotes: ⁽¹⁾ This summary sheet includes all costs for the AIM-9X Block II Production Program. FY 2011 and subsequent years fund the Block II program only. The unit cost in FY12 reflects one-time cost savings associated with combining LRIP-1 and LRIP-2 materials into one large buy, an 8 month domestic production schedule, and 173 FMS missiles. These unit cost savings will not occur in FY13. FY14 All Up Round unit cost decrease reflects the large increase in quantity. FY16 All Up Round unit cost increase reflects the incorporation of the Block II Plus materials required for aircraft platform survivability. ⁽²⁾ The Non-Recurring Engineering reflects incorporating form-fit-function replacement materials into the missile as well as obsolescence and loss of manufacturing sources for custom circuit cards related to the Inertial Measurement Unit, Control Actuator System, the missile Guidance Unit.

‡ Delivery rows marked with the ♦ symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

⁽⁴⁾ This item pertains to All Up Round Missiles

⁽⁸⁾ This item pertains to Captive Air Training Missiles

⁽⁹⁾ This item pertains to Containers

⁽¹⁰⁾ Due to system limitations, FMS quantities of 56 All Up Rounds are delivering in August of 2014.

⁽¹¹⁾ Due to system limitations, FMS quantities of 17 All Up Rounds are delivering in August of 2014.

P-5 Remarks:

Footnotes:

(12) This summary sheet includes all costs for the AIM-9X Block I Production Program. FY 2011 and subsequent years fund the Block II program only. In order to clarify the costs associated with producing AIM-9X Block II Missile hardware, support costs have been removed from the Missile Hardware Recurring section as such. 1. Systems engineering and integrated logistics costs have been removed from the Government In-House Systems Engineering line and combined with Program Management costs and placed into the new Government In-house Support line item within the Support Costs section . 2. Contract support costs have been removed from the Program Management line and placed into the new Contract Support line within the Support Costs section. 3. Government production related costs (e.g. Government Furnished Equipment and Government Acceptance Testing) have been removed from the Government In-House Systems Engineering line item, and identified separately as Government Cost (GFE & Test) within the Missile Hardware section. 4.The line item identified as Data has been removed from the Support Costs section and added to the All Up Round and Captive Air Training Missile costs consistent with contract awards.5. The Non-Recurring Engineering - Block II includes costs associated with identifying and replacing obsolete missile components in the production environment.

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description:</p> <p>Joint Standoff Weapon (JSOW) is a joint United States Navy (USN)/United States Air Force (USAF) program with the USN as the lead service. The JSOW program provides an air-to-ground glide weapon (AGM-154) capable of attacking a variety of targets during day, night, and adverse weather conditions for use against fixed area targets. The JSOW enhances aircraft survivability as compared to current interdiction weapon systems by providing the capability for launch aircraft to standoff outside the range of most target area surface-to-air threat systems. The JSOW Global Positioning System (GPS)/Inertial Navigation System (INS) capability allows several target kills per aircraft sortie.</p> <p>The JSOW Baseline BLU-97 variant (AGM-154A) has been integrated on USN (F/A-18C/D/E/F) and USAF (F-16C/D, B-2 and B-52) aircraft, with a Joint (USAF, USN) planned inventory of 3,334 units. USN will procure an inventory of 2,800 All-Up-Rounds (AURs) for integration on F/A-18 aircraft and the USAF has procured an inventory of 534 AURs for integration on F-16C/D, F-15E, B-1B, B-52, and B-2 aircraft. The JSOW BLU-108 (AGM-154B) variant provides an anti-armor/tank capability. Production of the AGM-154B variant has been deferred. The JSOW Unitary variant (AGM-154C) utilizes the common airframe of the AGM-154A and AGM-154B variants and incorporates an infrared uncooled seeker with Autonomous Targeting Acquisition. The payload includes a 500 pound class Broach multi-stage warhead. AGM-154C was approved for Low Rate Initial Production on 26 June 2003. Full Rate Production of the AGM-154C began in December 2004. The Navy's planned inventory is 7,000 JSOW AGM-154C AURs. A Network Enabled Weapon (NEW) moving maritime target capability is under development and has been incorporated in JSOW-C production units (AGM-154C-1 variant) starting with the FY09 procurement. The AGM-154-C-1 units retain the basic AGM-154C capability against fixed land targets.</p>

Gross Weapon System Cost				976.818			131.722			127.609			136.794			-			136.794

P-5 Remarks:

- Totals may not add due to rounding.
- Captive Air Training Missile (CATM) was added as a training requirement to the JSOW program. During early flight test assessment of the JSOW C-1, deviations were identified that indicated insufficient training aids within the training squadrons as well as the fleet squadrons. JSOW C-1 operations are more complex than the other JSOW variants due to the network enabled data link; therefore, training of the weapon will be critical in the successful employment of the weapon in the fleet. The program was able to fund CATM in FY14-FY18 by reducing the programs Engineering Change Orders (ECO) requirement.

FY14 CATM funding includes non-recurring engineering (NRE) costs to update engineering drawings and specs to include the integration of a data recorder and an access panel as well as associated acceptance testing of a prototype to verify the modifications.

Footnotes:

- FY14-18 received a reduction across the FYDP to account for Navy Working Capital Fund (NWCF) adjustments, economic assumptions and general program recissions.
- FY14-FY18 Government-in-house was restored to its original levels as a result of adjusting quantities for the All Up Round (AUR).
- ILS increased as a result of updated rates from the FPRA fixed priced rate agreement with the contractor signed in December 2012.

"A" in the Delivery Schedule indicated the Contract Award Date.
Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:
The STANDARD Missile-2 (SM-2) Medium Range (MR) and Extended Range (ER) missiles are solid-propellant, tail-controlled surface-to-air missiles which are the main air defense battery for AEGIS guided missile cruisers and destroyers. The SM-2 Block IIIB, SM-2 Block IV and earlier variants are currently deployed. The STANDARD Missile-6 (SM-6) Block I that combines the tested legacy of the SM-2 propulsion and ordnance with the AMRAAM active seeker is being developed to provide defense for Sea Shield and enable Sea Basing and Sea Striking. SM-6 Low Rate Initial Production (LRIP) began in FY09.

The SM-6 Block I will provide an extended range engagement capability to provide the air superiority and the umbrella of protection for joint U.S. forces and allies against the full spectrum of manned-fixed and rotary-winged aircraft, unmanned aerial vehicles, and land attack and anti-ship cruise missiles in flight, thereby contributing to the continuous protection of forward deployed ground maneuver forces as well as theater rear assets. The SM-6 will be the primary air defense weapon for AEGIS cruisers and destroyers and potentially future combatants.

MDAP/MAIS Code(s): 234,391			
Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.			
<p>Justification: STANDARD Missile Modification production (BLI 2356) ended in FY10.</p> <p>The last year of SM-2 Block IIIB All Up Round (AUR) missile procurement was FY11. Continually being upgraded to preserve battle group effectiveness against evolving cruise missile and anti-ship missile threats, the SM-2 missile has improvements which are procured for AEGIS cruisers and destroyers equipped with the MK41 Vertical Launch System (VLS). The SM-2 Block IIIB configuration, currently in production, improves the Block IIIA baseline through the Missile Homing Improvement Program (MHIP) to address a specific type of deployed threat. The SM-2 Block IV, with a new separable booster, evolved from the Block IIIA baseline missile to provide greater kinematic capability and dramatic increases in performance. The SM-2 Block IV is no longer in production.</p> <p>SM-6 was rephased to better align with the combat systems upgrades to Destroyers and Cruisers via ACB-12.</p> <p>With the addition of a fourth year of SM-6 LRIP in FY12 and the planned award of the Full Rate Production (FRP) contract in FY13, full support is required as SM-6 transitions from LRIP production to FRP production. The increase in FY14 appropriately adjusts production support funding to required levels for FRP efforts.</p> <p>Per OPNAV Direction of 11 July 2012, the Program of Record total procurement quantity for SM-6 is increased from 1200 to 1800. The estimated scheduled completion date is extended from FY19 to FY24.</p>

<p>P-5 Remarks: Support costs pay for efforts that support the completion of newly produced SM-2 Block IIIB All Up Round (AUR) missiles in BLI 2234, modified missiles in BLI 2356, and common STANDARD Missile items/efforts. These support costs are non-severable by STANDARD Missile variant. SM-6 support costs include unique SM-6 support items/efforts as identified in the Navy Service Cost Estimate.</p>

Footnotes: (1) Production Rates for Items 1-5 are TBD. The referenced Minimum Sustaining Rate is for the SM-2 AUR, which ended production buys in FY11. The MSR will be defined when the SM-6 program reaches Full Rate Production (FRP) which is planned to commence in FY 2013 with a procurement quantity of 94 missiles. (2) FY14 through FY18 award dates for SM-6 AURs are estimates (3) FY13-18 Canister contract is TBD; currently in full and open competition

‡ Delivery rows marked with the ♦ symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

⁽¹⁾ Production Rates for Items 1-5 are TBD. The referenced Minimum Sustaining Rate is for the SM-2 AUR, which ended production buys in FY11. The MSR will be defined when the SM-6 program reaches Full Rate Production (FRP) which is planned to commence in FY 2013 with a procurement quantity of 94 missiles.

Description:

Rolling Airframe Missile (RAM) is a high fire-power system based on the AIM-9 Sidewinder air-to-air missile to defeat anti-ship cruise missiles (ASCMs) as well as other airborne threats. RAM is a surface-to-air missile with passive dual-mode radio frequency/infrared (RF/IR) guidance (Block 0) and an active-optical proximity and contact fuse. RAM has minimal shipboard control systems and is autonomous after launch. Effective against a wide spectrum of existing threats, RAM Block 1 IR upgrade incorporates IR "all-the-way-homing" to improve performance against evolving passive and active ASCMs. RAM Block 2 provides increased kinematic capability against highly maneuvering threats and improved RF detection against low probability of intercept threats. The RAM missile is fired from a RAM Guided Missile Launching System (GMLS)(MK-49), which holds 21 RAM rounds.

COOPERATIVE AGREEMENTS:

RAM is a cooperative project with the Federal Republic of Germany. The U.S. and Federal Republic of Germany cooperatively produce Block 1 missiles, launchers and ORDALTs through the Block 1 Production MOA, Amendment 2 signed 28 September 2010. The Block 2 Production MOU is currently in the signature process with the U.S and Federal Republic of Germany to cooperatively produce Block 2 missiles, launchers, and ORDALTs and continue to provide support for Block 1 configuration through FY13-FY19.

[P5 / EF001 Block 1 Missile]: EF001 BLOCK 1 MISSILE

Previously this cost code only contained the Guidance and Control Assembly (G&C and Guided Missile Round Pack (GMRP) ORDALTs Hardware. Starting in FY11 costs in this Project Unit represent the cost for all up Block 1 missiles.

[P5 / EF002 Propulsion]: EF002 PROPULSION

Procures Propulsion Rocket Motors for the Guided Missile Round Pack (GMRP). Starting in FY11 these costs are included in Project Unit EF001.

[P5 / EF004 Safe and Arm]: EF004 SAFE & ARM DEVICE

Procures Safe & Arm Devices for the Guided Missile Round Pack (GMRP). Starting in FY11 these costs are included in Project Unit EF001.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Description:

AGM-114 Hellfire is a family of laser guided missiles employed against point and moving targets by both rotary and fixed wing aircraft. The family of Hellfire missiles includes, but is not limited to, AGM-114B/ K/K2/K2A/M/N/N-5/P/P+/R variants. These variants include shaped charge warheads (B/K/K2/K2A) for use against armored targets and blast fragmentation warheads (M/N) for use against urban structures. The AGM-114N is a Thermobaric blast fragmentation warhead that maintains the capability provided by the AGM-114M while adding a unique capability against confined compartmented spaces, a typical target type observed in current combat operations. Other variants include the K2A which has a blast frag sleeve for use against soft-skinned tactical vehicles, the N5 which provides a trajectory shaping capability to increase endgame lethality against vertical structures, the P/P+ variants which include high altitude launch trajectories for use from fixed wing aircraft, and the R which services all Hellfire targets with a single warhead. Conversions from one variant to another are done on an as needed basis.

Prior year funding includes Hellfire, Viper Strike and Griffin.

Exhibit P-40, Budget Item Justification Sheet: PB 2014 Navy		Date: April 2013
Appropriation / Budget Activity / Budget Sub Activity: 1507N: Weapons Procurement, Navy / BA 02: Other Missiles / BSA 2: Tactical Missiles		P-1 Line Item Nomenclature: 2254 - Hellfire
ID Code (A=Service Ready, B=Not Service Ready) : B	Program Elements for Code B Items:	Other Related Program Elements:
MDAP/MAIS Code(s):		
*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.		
Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.		
<p>Justification: All unit costs have been adjusted to reflect tri-service procurement and cost estimated by US Army, JAMS (lead service). FY12 Unit costs were based on a service combined quantity buy of 5155 missiles, of which 343 all-up-round (AUR) missiles are Navy missiles. FY13 Unit costs were based on a service combined quantity buy of 3229 missiles, of which 948 AUR missiles are Navy missiles. FY14 Unit costs were based on a service combined quantity buy of 2107 missiles, of which 288 all-up-round (AUR) missiles are Navy missiles. The Hellfire FY11 contract has been definitized and pricing has been changed for all years to reflect the most current unit pricing of the missile.</p> <p>The US Army and US Air Force will be procuring the Romeo (R) variant which contains additional capabilities such as: a new warhead with an integrated blast-frag sleeve, a height-of-burst fuze, and a cockpit-selectable delay fuze capability. The Navy is awaiting resolution of the Developmental Testing and Operational Testing Engineering Change Proposal prior to initiating full-scale procurement for the R variant.</p> <p>FY12 baseline funding will procure 284 Hellfire AUR and Air Training missiles. FY13 baseline funding will procure 919 Hellfire AUR and Air Training missiles. FY14 baseline funding will procure 363 Hellfire AUR and Air Training missiles.</p> <p>Reason funds are required for Overseas Contingency Operations (OCO): In FY12 the Navy expended 175 Hellfire missiles in Iraq and Afghanistan. The versatility of the Hellfire missile helps make it a key weapon in Overseas Contingency Operations (OCO). Because of the AH-1/ H-60 Armed Helo Requirements, this weapon is essential to Sea Shield and Sea Strike. Training equipment includes a mix of inert, ATM-114Q, and training guided missiles, M36E3, which are required to support critical training for combat aircrews prior to deployments to various theaters of operation. The DoN will continue to procure existing Hellfire variants in support of requirements. Current inventories are being depleted by combat expenditures in support of OCO and associated training. FY12 OCO funding of \$14M procured 206 missiles (107 AURs/99 Training) and associated cost; FY13 OCO funding of \$17M will procure 179 AUR missiles and associated cost. These OCO dollars are meant to replenish munitions expended in combat operations in theater, increase training assets and bring the inventory total near 60% of the requirement.</p> <p>Working through the Joint Attack Munitions Service (PM JAMS) as the Army's Lead Service agent, the Navy intends to convert any price advantage created through contract negotiations, other service procurement, and/or foreign military sales to increase the Navy procurement of Hellfire missiles.</p> <p>SOPGM funding for FY12 and out, which includes Griffin, moved to Budget Line Item (BLI) 226400, SOPGM. SOPGM historical data in FY10 and FY11 is captured in this BLI.</p>

‡ Delivery rows marked with the ♦ symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

⁽⁴⁾ MSR is for Tri-Service Procurment of the Army, Navy and Air Force

⁽¹³⁾ There is a break in deliveries between FY10 and FY11 procurements but the production line does not shut down. The contractor slowed production deliveries due to a subcontractor facility chemical explosion in the 3rd quarter of FY12. The Government is working to keep the production schedule healthy. FY10 deliveries will be delayed due to reduced production to prevent a shut-down due to limited quantities of missile motors.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: Stand Off Precision Guided Munition (SOPGM) weapons, Viper Strike and Griffin, are threshold weapons for the KC-130J Intelligence, Surveillance and Reconnaissance (ISR) Weapon Mission Kit USMC requirement. Both weapons are portions of the required roll-on/roll-off capability inherent in the ISR Weapon Mission Kit. The Viper Strike is a glide weapon with Global Positioning System/Inertial Navigation System (GPS/INS) navigation to the target vicinity and a semi-active laser (SAL) seeker used for terminal guidance to target impact. The Griffin is rocket propelled and similarly uses GPS/INS to navigate to the target vicinity and a SAL seeker for terminal guidance. Griffin will be used on KC130J and Cyclone class Patrol Coastal (PC) ships.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.		
<p>Justification:</p> <p>Baseline Justification: Griffin Missile Base funding is required to support Griffin Missile System Rapid Deployment Capability (RDC) programs for the Patrol Coastal (PC) and Littoral Combat Ships (LCS). The RDCs provide an anti-surface missile capability to improve the ships ability to defend against enemy small boat attacks.</p> <p>The Department chose to invoke Buy to Budget Authority for the FY12 all up round contract. Supporting exhibits reflect the actual FY12 Qty of 159 Naval Air Systems Command (NAVAIR) and 67 Naval Sea Systems Command (NAVSEA) for a total of 226. To match the supporting exhibits, the P-40 should have a FY12 Qty of 226.</p> <p>FY 2012 Base funding procures 67 Griffin missiles. FY 2014 Base funding procures 50 Griffin Missiles.</p> <p>OCO Justification: In FY12, the Navy expended 14 Griffin missiles in Afghanistan. The Department of the Navy does not have sufficient Griffin weapons inventory to support the USMC KC-130J ISR Weapon Mission Kit Urgent Universal Need Statement for OCO.</p> <p>FY 2012 OCO funding procures 159 Griffin missiles. FY 2013 OCO funding procures 50 Griffin Missiles.</p>

Footnotes:																				
(1) Bravo Variant cost in FY14 is higher than the previous Alpha Variant unit costs because the Bravo Variant includes launch and flight motors and because fewer missiles are being bought between NAVSEA, NAVAIR, and Special Operations Command (SOCOM) in FY14. The Department chose to invoke Buy to Budget Authority for the FY12 all up round contract. Supporting exhibits reflect the actual FY12 Qty of 159 (NAVAIR) and 67 (NAVSEA) for a total of 226. To match the supporting exhibits, the P-40 should have a FY12 Qty of 226.																				
(2) The Department chose to invoke Buy to Budget Authority for the FY12 all up round contract. Supporting exhibits reflect the actual FY12 Qty of 159 (BSO 19) and 67 (BSO 24) for a total of 226. To match the supporting exhibits, the P-40 should have a FY12 Qty of 226.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

The Aerial Targets program provides threat representative target capabilities to meet requirements for fleet training and weapons systems test and evaluation. The program is composed of a series of continuing target production programs whose product line includes subsonic and supersonic powered targets, towed targets and necessary Target Control and Target Augmentation and Auxiliary Systems.

Item Schedule		ID CD	Prior Years			FY 2012			FY 2013			FY 2014 Base			FY 2014 OCO			FY 2014 Total

*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

Major efforts include the continued procurement of GQM-163A Supersonic Sea Skimming Targets (SSST) for FY2012 to FY2014. GQM-163A production will pause in FY2015 and its continuation will be addressed in future budget cycles. The GQM-173A Multi-Stage Supersonic Target (MSST) program will resume Engineering and Manufacturing Development (EMD) flight testing in late 2013. Milestone (MS) C is now planned for FY2015. The BQM-177A Sub-Sonic Aerial Targets (SSAT) program will begin EMD flight testing in 2013. MS C is planned for FY2015 with IOC in FY2016. Continued procurement of TA/AS for FY2012 to FY2018 include target command/control equipment, scoring equipment, location and identification equipment, navigation equipment, electronic countermeasures equipment, active emitter

Footnotes:																				
(1) EM031 BQM-74 Replacement (SSAT) now BQM-177 FY13 Milestone C moved to FY15. FY2017 to FY2018 quantities decreased from 53 to 32 causing the unit cost to increase.																				
(2) EM441 FY15 decreased due to program adjustments to reflect current budget projections.																				

UNCLASSIFIED

Exhibit P-40A, Budget Item Justification For Aggregated Items: PB 2014 Navy		Date: April 2013
Appropriation / Budget Activity / Budget Sub Activity: 1507N: Weapons Procurement, Navy / BA 02: Other Missiles / BSA 2: Tactical Missiles	P-1 Line Item Nomenclature: 2280 - Aerial Targets	Aggregated Item Name: Aerial Targets
<p>(3) EM452: Congressional New Start Notification for FY2012 was approved for BQM Target Upgrades. The return of fleet training requirements to live fire evolutions has placed current and projected usage and expenditure of the BQM-74 targets higher than inventory will allow and will lead to a critical shortfall prior to IOC of BQM-177. In an effort to mitigate the anticipated gap the increased BQM-34S allocations will augment the BQM-74 requirements. ECP 006R1 upgrades the avionics and remedies obsolescence issues in the BQM-34S-41 by inaugurating a BQM-34S-55 variant.</p> <p>(4) EMA01 GQM-173 hardware budget line is composed of a government estimate based on cost model predictions. The cost model shows a 6% to 8% increase in the respective years and the 14% increase is due to NRE and ancillary equipment estimates. FY13 and FY14 decreased due to GQM-173A Milestone C shifting from FY14 to FY15.</p> <p>(5) EM704 FY13 and FY14 MSST program was re-baselined and production is now planned for FY15.</p> <p>(6) EM705 FY13 and FY14 MSST program was re-baselined and production is now planned for FY15. The \$800K for containers in FY15 is due to needing additional containers that were previously thought would be carried over from EMD. Some of the containers that were developed in EMD were thought to be able to be carried over to production once all EMD flights were complete; however some of them will be destroyed during container qualification testing.</p> <p>(7) EM874 FY13 and FY14 MSST program was re-baselined and production is now planned for FY15.</p> <p>(8) EM854 FY13 and FY14 MSST program was re-baselined and production is now planned for FY15.</p> <p>(9) Long Lead Component funds are for the procurement of rocket motors. FY12 increase from \$360K to \$967K actual negotiated priced received in April of 2012.</p> <p>(10) EM203 GQM-163A Supersonic target increased target quantity in FY2013. The return of live-fire testing has caused an increase in planned target operations and expenditures.</p> <p>(11) EM422 FY12 decrease due to program office realigning funding to BQM Target Modification.</p> <p>(12) FY13 - EM442 GQM-163A FY13 increased significantly due to Augmented Flight Termination System (AFTS) and Closer Approach Mission Kit requirements.</p> <p>(13) Long Lead Component funds are for the procurement of D6AC steel for production of GQM-163A ducted rocket housings.</p> <p>(14) Prior Year Total Costs include Elements of cost that are no longer funded in the FYDP and have no remaining undelivered assets.</p>

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: The MK-41 Vertical Launching System (VLS) is a surface combatant missile launching system, designed to store, select and launch various STANDARD Missile configurations, TOMAHAWK, Tactical TOMAHAWK, EVOLVED SEASPARROW (ESSM) and Vertical Launch ASROC (VLA) missiles. The MK-41 VLS significantly improves missile capacity, flexibility, multi-mission capability, reaction time and rate of fire and is designed to be adaptable to present and future weapon systems. Current configurations are: two 61 cell launchers, forward and aft, for 22 TICONDEROGA (CG 47) Class Cruisers beginning with CG-52; one 61 cell aft and one 29 cell launcher forward for 28 ARLEIGH BURKE (DDG 51) Class Destroyers; and one 64 cell launcher aft and one 32 cell launcher forward for 34 DDG 51 FLT IIA ships. [P40A / ILS SUPPORT]: Funds ILS support for MK-41 VLS canisters and canister support equipment including ECP development, production support, and technical documentation. [P40A / CANISTER EQUIPMENT]: Funds procurement and installation of canister and gas management hardware ECPs and ORDALTs.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.			
Justification: Funds are required for production support and Integrated Logistics Support (ILS) including supply support, provisioning, and technical documentation in support of weapon stations, All Up Round (AUR) facilities, and the Fleet. Funds also provide for development and procurement of critical Engineering Change Proposals (ECP) and Ordnance Alterations (ORDALT) that improve reliability and implement safety upgrades for MK 41 VLS canisters and gas management hardware. Availability of upgraded canisters, canister hardware, and gas management hardware directly impacts Fleet loadouts, operational availability, and safety.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

The Evolved SEASPARROW Missile (ESSM) Program is an international cooperative effort to design, develop, test, produce and provide in-service support to a new and improved version of the SPARROW missile (RIM-7P) with the kinematic performance to defeat current and projected threats that possess low altitude, high velocity and maneuver characteristics beyond the engagement capabilities of the RIM-7P. The ESSM provides an evolved kinematically improved aft-end missile section for mating, as an All Up Round, with the modified RIM-7P forebody guidance and warhead section. The ESSM provides the capability to counter high G maneuvering anti-ship missiles, expand the battle space, and increase system firepower. Additionally, ESSM provides robust defense against asymmetric threats such as small surface craft, low velocity air threats and helos. The ESSM is designed for "quad pack" use in the MK41 Vertical Launching System of AEGIS destroyers and cruisers and in the MK 57 launching system on DDG 1000. In Feb 08 ESSM began integration into Ship Self-Defense System (SSDS) on CVN's, LHD- 7/8 and LHA-6.

ESSM is a cooperative effort among ten NATO SEASPARROW nations (Australia, Canada, Denmark, Germany, Greece, Netherlands, Norway, Spain, Turkey, and the U.S.). An addendum to the NATO SEASPARROW Surface Missile System Memorandum of Understanding (MOU), covering the Engineering and Manufacturing Development (EMD) phase of the ESSM was signed in June 1995. The MOU for the cooperative production of ESSM was signed 27 December 1997 with a U.S. production intent of 2076 missiles. Authority to enter Low Rate Initial Production (LRIP) for 207 missiles was granted 7 March 2001. Approval for Full Rate Production was given 12 January 2004. IOC'd on DDG-51 Fit IIA Spring 04.

<p>*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.</p> <p>Justification: The FY14 request will support a contract award of 53 missiles plus the U.S. share of support as defined in the MOU. The budget is based on approval of a three year (FY13-FY15) multi-year contract for 194 missiles worth \$178 million at a total savings in excess of \$50 million to the Department of Navy.</p> <p>The FY14 request will also support the new flex harness which replaces the Unit 8 round wire harness that connects the units in the guidance section. Analysis of reliability data for all ESSM firings has identified the technically obsolete guidance section Unit 8 harness as the biggest contributor of ESSM reliability failures. The updated flex harness can be installed in guidance sections when they are returned for depot level repair. Use of this new harness is expected to increase the in-flight reliability of the ESSM inventory.</p> <p>The unit cost increase for MK25 Quadpack Canisters is due to a reduction of procurements by the international NATO SEASPARROW Consortium partners.</p>

Appropriation / Budget Activity / Budget Sub Activity: 1507N: Weapons Procurement, Navy / BA 02: Other Missiles / BSA 3: Modification Of Missiles							P-1 Line Item Nomenclature: 2307 - Evolved Sea Sparrow Missile (ESSM)							Item Nomenclature (Item Number - Item Name, DODIC): Evolved Sea Sparrow Missile (ESSM)					
Cost Elements († indicates the presence of a P-5A)	ID CD	All Prior Years			FY 2012			FY 2013			FY 2014 Base			FY 2014 OCO			FY 2014 Total		
		Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)	Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)	Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)	Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)	Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)	Unit Cost (\$)	Quantity (Each)	Total Cost (\$ M)
5.4) ILS/FLEET DOCUMENTATION		-	-	-	-	-	-	-	-	0.600	-	-	0.617	-	-	-	-	-	0.617
5.5) COMPONENT IMPROVEMENT/ECPS (1)		-	-	-	-	-	-	-	-	4.321	-	-	7.500	-	-	-	-	-	7.500
Total Support Cost				247.628			22.331			24.619			24.620			-			24.620
Gross Weapon System Cost				800.899			48.486			58.194			76.749			-			76.749
P-5 Remarks: Footnotes: (1) Supports the new flex harness which replaces the Unit 8 round wire harness that connects the units in the guidance section. Analysis of reliability data for all ESSM firings has identified the technically obsolete guidance section Unit 8 harness as the biggest contributor of ESSM reliability failures. The updated flex harness can be installed in guidance sections when they are returned for depot level repair. Use of this new harness is expected to increase the in-flight reliability of the ESSM inventory.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Description:

AGM-88E ADVANCED ANTI-RADIATION GUIDED MISSILE (AARGM) is an ACAT-1C acquisition program to upgrade, and use as a compliment to, the Legacy AGM-88 High Speed Anti-Radiation Missile (HARM) with multi-mode guidance and enhanced targeting capability. AARGM program will integrate multi-mode guidance (passive Anti-Radiation Homing (ARH)/active Millimeter Wave (MMW) Radar/ Global Positioning system(GPS)/Inertial Navigation System) on the HARM AGM-88 missile. AARGM weapon system capabilities include: active MMW terminal guidance, counter shutdown, expanded threat coverage, enhanced ARH receiver, netted targeting real-time feed via Integrated Broadcast System (IBS) prior to missile launch, Weapon Impact Assessment (WIA) transmission prior to detonation, GPS point-to-point weapon navigation, and weapon employment with impact avoidance zone/missile impact zones. IBS Receiver interfaces will enable the warfighter to directly receive national intelligence data, increasing overall pilot situational awareness. AARGM AGM-88E production units possess the capability to engage targets in the Destruction of Enemy Defenses (DEAD) mission area and will be able to destroy non-traditional and Overseas Contingency Operation targets.

Manufacturer Name: ATK ⁽⁶⁾					Manufacturer Location: Woodland Hills, CA		
Administrative Leadtime (<i>in Months</i>): 7					Production Leadtime (<i>in Months</i>): 19		
Dates	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018
Contract Dates	Sep 2012	May 2013	May 2014	May 2015	May 2016	May 2017	May 2018
Delivery Dates	Jan 2014	Dec 2014	Dec 2015	Dec 2016	Dec 2017	Dec 2018	Dec 2019
Installation: HARM Mods (AARGM)			Method of Implementation: Not Installed - AUR Installation Kits			Installation Quantity: 1750	
Installation: HARM Mods (AARGM)			Method of Implementation: Not Installed - Training Equipment (CATMs)			Installation Quantity: 121	
Installation: HARM Mods (AARGM)			Method of Implementation: Not Installed - Containers			Installation Quantity: 937	
Footnotes: ⁽¹⁾ 1. Procuring one container for every two All-Up-Round and/or Captive Air Training Missile (CATM) missiles. 2. Other Production Support required to fund special test equipment (STE), calibration equipment and tooling in order to meet production ramp. 3. LRIP III deliveries will average 3 per month ramping up to 5 per month. Under FRP, average monthly deliveries are expected to be 5-7 per month. ⁽²⁾ Support Equipment FY14 to FY15 increase is to support the 24% increase in missile quantity procurement. FY18 increase is result of increased production rate being realized and additional equipment to support the quantity increase. ⁽³⁾ ECO is used for continuous improvement program engineering changes to reduce missile cost and improve producibility. ⁽⁴⁾ Additional funding was received in FY 2012 for Non-Recurring Engineering for Continuous Improvement Program (CIP) efforts which include A2 Circuit Card Assembly Redesign, Monolithic Microwave Integrated Circuit (MMIC) Switch Obsolescence (MMIC Switch, MMIC Low Noise Amplifier and IMPact Avalanche and Transit Time (IMPATT)Diode)) and US Only Control Section Production Software to reduce unit cost. ⁽⁵⁾ FY12 reflects execution actuals for Special Tooling (ST)/Special Test Equipment (STE). Adjustments will be made to FY13 and FY14 in future budgets to line items (Support Equipment, ST/STE for Production Support and Other Production Support) to reflect expected funding totals. ⁽⁶⁾ Initial Manufacturing Production Lead Time (PLT) is changed to more accurately reflect long lead times. Previous long lead times were artificially low due to contractor purchasing material at risk.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: This budget provides funding to close, deactivate, prepare, and convey the Government-Owned Contractor Operated (GOCO), Naval Weapons Industrial Reserve Plant (NWIRP) in Bedford, MA under the cognizance of Naval Sea Systems Command (NAVSEA) supported by WPN funds. This budget also provides funding which supports capital-type rehabilitation projects in the areas of environmental, safety, major repair, and energy conservation at the active Naval Industrial Reserve Ordnance Plant (NIROP) Allegany Ballistics Laboratory (ABL) and inactive NWIRP. Capital-type rehabilitation projects at the GOCO plant, NIROP ABL in Rocket Center, WV, supports weapons systems such as AARGM, RAM, Sparrow, ESSM, ERGM, AIM-9X, AGS, Tomahawk GG and Trident GG. [P40A / ENVIRONMENTAL]: Provides funds to eliminate environmental deficiencies in compliance with local, state, and federal OSHA regulations. These regulations mandate requirements which must be met if plant shutdowns, criminal liability, and severe financial penalties are to be avoided. [P40A / SAFETY]: Provides funds to eliminate safety deficiencies in compliance with local, state, and federal OSHA regulations. These regulations mandate requirements which must be met if plant shutdowns and severe financial penalties are to be avoided. [P40A / ENERGY CONSERVATION]: Provides funds to decrease energy consumption by installing new energy efficient systems and provides increased maintenance on these systems. Mandated in 1993 by Congress (Defense Appropriations Committee). [P40A / MAJOR REPAIRS]: Provides funds for critical upgrades to maintain high liability areas such as fire and security systems, roofs, boilers, electrical distribution systems, bridge crane systems, and other structural repairs essential to maintain the industrial integrity of the plant. [P40A / FACILITIES RESTORATION (ABL)]: Provides funds for replacement of Weapons Industrial Facilities at NIROP ABL in Rocket Center, WV that have exceeded their useful life and deteriorated beyond safe operations (personnel & explosive).

*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:
Funding is required in to address critical infrastructure issues.

FY14 funding will support the \$2.05M procurement of an explosive storage magazine for NIROP ABL. Explosive storage magazine facilities provide storage space of ordnance produced at NIROP ABL, which is required for security and safety of the personnel, equipment and facilities producing warheads, rocket motors and fuzes. Presently, storage in the existing magazines is at approximately 95% capacity based on floor space utilization. Plant production of explosive ordnance is expected to grow by 40% to 50% over the next several years and with existing storage near capacity, additional magazines will be required to support this growth. Existing small storage magazines are inefficient and in need of renovation. Installation of new standard magazines will allow older magazines to be emptied for demolition or restoration, and will greatly enhance operational safety at ABL.

Federal Acquisition Regulation Part 52.245-7 specifies that Facilities Use contracts require that the Government fund capital type rehabilitation projects to support and maintain these facilities. These plants have an average age of 45 years and lack of proper maintenance will limit capabilities to maintain scheduled production rates and overall productivity. Funding is separated to reflect environmental, safety, major repair, energy conservation and facilities restoration.

Exhibit P-40A, Budget Item Justification For Aggregated Items: PB 2014 Navy		Date: April 2013
Appropriation / Budget Activity / Budget Sub Activity: 1507N: Weapons Procurement, Navy / BA 02: Other Missiles / BSA 4: Support Equipment & Facilities	P-1 Line Item Nomenclature: 2433 - Fleet Satellite Comm Follow-On	Aggregated Item Name: Fleet Satellite Comm Follow-On

⁽²⁾ Each EELV buy for the MUOS Satellites #1 through #5 "EELV Launch Service (ELS)" are separate buys that are individually negotiated separate from other DoD missions in that year and from other MUOS missions in follow-on years. The Launch and Range Systems Wing (LRSW), at Space and Missile Systems Center (SMC), provides the Navy with the estimated prices/costs for the ELS contract, Mission Unique Costs, and Launch Campaign support.

⁽³⁾ The Ground System Updates line includes on-site and depot replenishment and tech refresh equipment for the entire MUOS Ground system, which includes 4 remote access facilities (or ground stations) and 2 satellite control facilities. The unit cost fluctuations are driven by varying system configuration requirements (i.e. equipment type, cost, and quantity) and location of the particular sites. As a result of site-specific requirements, costs are not allocated evenly across all the sites per FY. The budget is scaled to provision the entire ground system with adequate replenishment equipment to mitigate parts obsolescence and availability issues . FY12 quantity represents 3 ground stations and 2 satellite control facilities. FY13 -18 represents 4 ground stations and 2 satellite control facilities.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

In FY12, the Navy requested Lockheed Martin, Sippican (LMS) to submit an updated cost proposal for MK30 Mod 2 Non-Recurring Efforts to address obsolescence. LMS's proposal was significantly higher than Government estimates making the procurement of 9 MK30 Mod 2 targets and removal of MK30 Mod 1 targets at an operational-site unachievable. As a result, the Navy decided to realign funding within the budget line item and procure MK39 Mod 2 EMATTs to address inventory shortfalls rather than MK30 Mod 2's. In the FY13 President's Budget Submit, funding was added in FY13 to procure additional MK39 Mod 2 EMATTs targets to balance the inventory.

MK39 Mod 2 EMATTs with True Echo Repeat (TER) Engineering Change Proposal (ECP) capability is planned to be cut into production in FY13 and will address shortfalls in target's capability with air and surface sonar and is anticipated to improve performance with torpedoes.

WPN funding was reinstated for MK30 MOD 1 SLEP to continue to extend the MK30 MOD 1 Target Service Life until the Navy transitions to the new generation 6" ASW Expendable Target.

5	LOCKHEED MARTIN/ SIPPICAN FY 12/2 - Marion, MA	-	-	-	-	-	12	12	-	-	12	12

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Footnotes:

⁽³⁾ For the new Lockheed Martin Sippican MK39 Mod 2 EMATT contract, the lead time from contract award to delivery of the first unit is 18 months for the base year and 12 to 13 months after option exercise for FY12 to FY15.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

This line item procures MK54 Mod 0 Torpedo Kits, MK54 Mod 1 Torpedo Kits, MK54/Vertical Launch Anti-submarine Rocket (VLA) Conversion Kits, VLA Components, and High Altitude ASW Weapon Capability (HAAWC) kits for lightweight torpedoes. The MK54 Mod 0 Lightweight Torpedo maximizes the use of Non-Developmental Item (NDI) Technologies, incorporating the proven technologies from existing torpedo programs with state of the art Commercial-Off-The-Shelf (COTS) processors and is a modular upgrade to Lightweight Torpedo Inventory. MK54 Mod 1 builds on the MK54 Mod 0 improvements to expand the torpedoes capability in shallow water littoral environment and also improves the torpedoes counter-countermeasure capability to allow higher effectiveness in current and future threat environments. The MK54 is an anti-submarine torpedo deployed from surface ships and ASW air platforms in littoral scenarios operating in shallow water acoustic and environmental conditions, effective in the presence of threat countermeasures and capable in deep water engagements.

[P40A / F5003 SUPPORT EQUIPMENT]: Funding under this cost code provides for procurement and maintenance of support and test equipment at Naval Undersea Warfare Centers (NUWC) Keyport, NUWC Newport, and the contractor facility for assembly, testing and integration.

[P40A / F5104 MK 54 MOD 0 HARDWARE]: Funding under this cost code provides for the procurement of MK54 hardware kits from the contractor, engineering change proposals (ECPs) and non-recurring engineering to resolve production issues including obsolescence. The MK54 Mod 0 Kit procurement consists of three electronic assemblies, associated cables, fuel tank, and afterbody upgrade items. These items are integrated with a MK46 torpedo warhead and afterbody and with a modified MK50 array and transmitter. Funding under this cost code will also procure new acoustic arrays and transmitters beginning in FY12, and upgrade of MK50 torpedo array electronics to be compatible with MK54 requirements. Also included is Government installation of the kits into All Up Rounds. In President's Budget 2013, the Navy provided additional funding to procure MK54 Mod 0 kits in FY15 to balance the MK54 Mod 0 inventory.

[P40A / F5110 MK54 MOD 1 HARDWARE]: Funding under this cost code provides for procurement of MK 54 MOD 1 kits which will include the afterbody and Control Group Assembly (CGA) from the current MK54 Mod 0 Kits and all new components which includes a 112 element array, new Processor Group Assembly (PGA), and a new transmitter. The components changes on the MK54 Mod 1 program are the array, transmitter, and processor guidance assembly. All the other components from the MK54 Mod 0 remain the same. This cost code will also provide for installation costs, and the associated engineering tasks. MK54 Hardware Mod 1 Kits will start Low-Rate Initial Production (LRIP) in FY14 with Full-Rate Production (FRP) starting in FY16.

ID Code (A=Service Ready, B=Not Service Ready) : A					Program Elements for Code B Items:					Other Related Program Elements:										
MDAP/MAIS Code(s):																				
<p>[P40A / F5103 FIELD SUPPORT OPERATIONS]: Funding previously allocated for field support tasks to upgrade MK46 Torpedo VLA to MK54 Mod 0 Torpedo VLA.</p> <p>[P40A / F5105 FLEET EXERCISE SYSTEMS]: Funding under this cost code provides for procurement of MK54 Fleet Exercise Sections (FES) utilized during in-water acceptance testing of MK54 kits, Fleet exercises and Developmental and Operational Testing.</p> <p>[P40A / F5107 MK 54/ VLA KITS]: Funding under this cost code provides for procurement of MK54 VLA upgrade kits, associated hardware, installation costs, and the associated engineering tasks which supports the conversion and upgrade existing MK46 VLA's to be compatible with the new MK54 Mod 0 Torpedo. The MK54 VLA upgrade kit is comprised of an upgraded Digital Auto-Pilot Control (DAC) unit, upgraded air stabilizer, upgraded Thrust Vector Controller (TVC), new MK54 Torpedo Downloader System (TDS) payload cable, and new Nose Cap. The MK54/VLA Kit procures and installs modified VLA items for MK54 compatibility. A MK54/VLA Kit consists of modifications to the Digital Autopilot and Air Stabilizer and new Nose Caps and cables.</p> <p>[P40A / F5108 VLA COMPONENTS]: The VLA Components procures replacement VLA items consumed during Fleet exercises to maintain adequate Fleet inventory levels and sustain the industrial base. Funding under this cost code provides for procurement of all new MK54 configured VLA materials, VLA Canister, installation costs, and the associated engineering tasks needed in order to build all-up-round VLA. VLA components include Rocket Motors, TDS cable and other associated cables, upper and lower airframes, separation bands, thrust plate, Digital Auto-Pilot Control (DAC), Thrust Vector Controller (TVC), payload cable and nose cap. Components procured between FY11 to FY12 will be produced and delivered by a sole source contract with Lockheed Martin Akron, OH. This line also provides an upgraded VLA Canister which is provided as sole source from BAE Minneapolis, MN. In FY 13 President's Budget the Navy made a vertical cut to VLA Components starting in FY13 and out in order to fund other Navy higher priorities, due to the higher than budgeted unit costs, and low production rates. The Navy is studying the future requirements for VLA as the current VLA inventory is well below requirements. A new VLA USN contract for VLA Component Sets was awarded sole source to Lockheed Martin Akron in June 2012 for both the FY11 and FY12 VLA requirements.</p> <p>[P40A / F5109 HAAWC]: Funding under this cost code provides for procurement and installation of the MK54 High Altitude ASW Weapon Capability (HAAWC) for the P-8 aircraft. Low-Rate Initial Production (LRIP) begins in FY14. HAAWC is an air-launched accessory (ALA) that allows for employment of the MK54 outside the current fixed wing air launch envelope.</p> <p>[P40A / F5830 PRODUCTION ENGINEERING IN-HOUSE]: Funding under this cost code provides for production engineering tasks performed by NUWC Newport and Keyport and includes review of contractor generated ECPs, review and resolution of contractor failures and proposed corrective action, configuration management activities, contractor monitoring, risk analysis, technical problem resolution, software engineering, safety, integrated logistics support, environmental engineering, and information systems. Funding maintains production specification in accordance with production processes and provides subject matter experts to support root cause analysis of failed contractor hardware and monitor contractor defect resolution and reduction processes to ensure deficiencies are effectively addressed.</p> <p>[P40A / F5840 QUALITY ASSURANCE]: Funding under this cost code provides for quality assurance tasks performed by Naval Undersea Warfare Center Newport and Keyport including: conducting quality assurance reviews of the contractor and subcontractors, documentation indicating contractor conformity to product performance requirements, and review of objective quality evidence.</p> <p>[P40A / F5860 ACCEPT TEST & EVALUATION]: Funding under this cost code provides for production acceptance of contractor hardware.</p> <p>[P40A / F5900 PRODUCTION ENGINEERING CONTRACTOR]: Funding under this cost code provides for contractor support to the program office.</p>

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.																					
<p>Justification: Program funding increases are due primarily to: (1) an increase in MK54 Mod 0 Kit procurements and related costs; (2) the addition of MK54 Mod 1 Kit procurements and related costs; and (3) the addition of HAAWC procurements.</p> <p>The MK54 Mod 0 Kit contract, which consists of a base year plus four option years, was awarded September 2011 to Raytheon. The contract contains unit price breaks for various quantity bands in option years due to quantity unit price efficiencies and learning. The contract award dates and deliveries on the P5A are reflective of the MK54 Mod 0 hardware kits from Raytheon. A competitive contract for new acoustic arrays and transmitters will be awarded in March 2013. The delivery dates for the acoustic array will parallel the delivery dates for the MK54 MOD 0 Kits. The FY12 option 1 exercise for the MK54 Mod 0 Kits was awarded in September 2012.</p> <p>Prior year procurements include 17 kits (FY00), 29 kits (FY03), 51 kits (FY04), 94 kits (FY05), 103 kits (FY06), 9 kits (FY07), 131 kits (FY08), 136 kits (FY10), and a USN and FMS combined 272 kits (FY12).</p>

Footnotes: (1) The award and delivery are reflective of the MK54 Mod 0 hardware kits from Raytheon. A competitive contract for new acoustic arrays and transmitters will be awarded in September 2012. The delivery dates for the acoustic array will be consistent with the delivery dates for the MK54 Mod 0 Kits. (2) The MK54 Kits contract awarded to Raytheon will provide the Afterbody and the Control Group Assembly (CGA) in FY14 and FY15. The award and delivery dates in the P5A are reflective of the MK54 kit contract to Raytheon for the afterbody and Control Group Assembly. A sole source procurement will be awarded to Progeny for the remaining new components of the MK54 MOD 1 kit, which includes a 112 element array, new Processor Group Assembly (PGA), and a new transmitter. The delivery dates for the Progeny portion of the MK54 Mod 1 kit delivery will parallel the delivery date for the Raytheon portion of the MK54 Mod 1 Kit. In FY16, a new competitive contract will be awarded to procure additional Afterbodies and CGA's and procurement lead time of 30 months for the new contract create a delivery gap in the MK54 Mod 1 deliveries between FY17 and FY18.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description: This line item procures MK48 Mod 7 Common Broadband Advanced Sonar System (CBASS) kits for Heavyweight Torpedo Upgrades.</p> <p>The MK-48 ADCAP MODs kit incorporates a new Guidance and Control (G&C) modification. The G&C Modification provides a common G&C with the Mod 7 CBASS replacing obsolete electronic components with Commercial Off The Shelf (COTS) processors and increased processing capacity. The increased capacity is required for future advanced signal processing techniques that are needed for performance upgrades in shallow water target detection/classification. This modification allows the MK-48 ADCAP torpedo to operate effectively in adverse environments, enabling the MK-48 ADCAP torpedo to counter foreseeable enemy submarine threats.</p> <p>The CBASS torpedo kit consists of two major components: G&C, and a Broadband Sonar Analog Receiver (BSAR). The G&C is continuous from the MODs in production from FY05, and procurement of the BSAR began in FY06. The BSAR is a CBASS specific item which consists of a preamplifier, receiver, and interfacing hardware that provides the capability to transmit and receive over a wide frequency band, taking advantage of broadband signal processing techniques. This provides for improvements in advanced threat countermeasures (CMs) capabilities.</p> <p>The MK48 Mod 7 CBASS Kit competitive contract was awarded on 4 March 2011 to Lockheed Martin Sippican, Marion MA. The contract was awarded for a total of 103 MK48 Mod 7 Kits, of which, 81 kits were procured with FY10 funding, and 22 kits with FY11 funding. The Lockheed Martin Sippican contract contains priced options for FY12 to FY15. A new competitive contract is planned for FY16.</p> <p>[P40A / D1001 - Hardware]: D1001 - HARDWARE Funding under this cost code provides for the procurement of CBASS hardware kits from the contractor, engineering change proposals and non-recurring engineering to resolve production issues including obsolescence. Non-recurring Engineering (NRE) funds base contract year technology refresh due to obsolescence issues and non-deliverable hardware consumed in production acceptance testing. In option years and out-years, this NRE also contains reserve for prior year Fixed Price Incentive (FPI) CLINs to pay for the government's share of billing price increases along the contract's share line. FPI CLINs are only funded to target price at award. Engineering Services and Engineering Change Proposals (ECPs) pays for studies, plans, design changes and implementation of design changes at the contractor, primarily due to obsolescence that occurs during the contract performance. Also included in this cost code is the cost of government installation of kits procured in prior years. The installation includes required upgrades to convert the MK48 Mod 6 Torpedo into a MK48 Mod 7 Torpedo. The pre-amp, guidance control box, EMI filter, and Broadband Sonar Analog Receiver (BSAR) are installed and replaced at the</p>

MDAP/MAIS Code(s):		
Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.		
<p>Justification: The MK48 Mod 7 CBASS kit contract was awarded in March 2011 to Lockheed Martin Sippican (LMS) and the contract has a base year plus four option years. The LMS MK48 Mod 7 CBASS kit contract contains unit price breaks for various procurement quantity bands in each option year due to quantity unit price efficiencies and learning curve. The MK48 Mod 7 Kit unit prices for the budget were taken directly from the option unit prices for the FY12 through FY15 options. The awarded LMS MK48 Mod 7 kit contract includes an increase of approximately 3% inflation per year for similar quantities in each of the quantity bands for step ladder prices from year to year. A new competitive contract is planned in FY16 and significant Non-Recurring Engineering effort is anticipated to address COTS obsolescence.</p> <p>After the PB-13 submission, the new prime contractor for CBASS Kits informed the program of significantly under estimating the time required to produce the test equipment and proof of manufacturing units on the new competitive contract. The Fixed Priced Incentive contract type chosen by the government has protected the government from the significant overruns that contractor is projecting. The impact is that there is a significant shift in production deliveries and as a result, the government has shifted the install funding in cost code D1001 in FY13 and FY14 to procure additional kits. The number of CBASS kits procured over the FYDP is unchanged.</p>

Footnotes:

(1) After the PB-13 submission, the new prime contractor for FY10/11 CBASS Kits informed the program of under estimating the time required to produce the test equipment and proof of manufacturing (POM) units on the new competitive contract. The Fixed Priced Incentive contract type chosen by the government has limited the government's liability in overruns that the contractor is projecting. The impact to the PB-14 Budget is that there is a shift in production deliveries and as a result, the government has shifted the installation funding in cost code D1001 in FY13 and FY14 to procure additional kits. Due to excess production capacity, the contractor has committed to regain the originally awarded schedule by the end of the FY14 deliveries.

Footnotes: ⁽²⁾ The MK48 Mod 7 CBASS Kit competitive was awarded on 4 March 2011 to Lockheed Martin Sippican, Marion MA. The contract was awarded for a combined total of 103 MK48 M0d 7 Kits, of which 81 kits were procured with FY10 funding and 22 kits with FY11 funding. ⁽³⁾ The delivery gap from FY12 to FY15 is due to a delay in the FY10/FY11 competitive contract award and a schedule delay in the delivery of Proof of Manufacturing (POM) units.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: The QUICKSTRIKE (QS) family of air delivered mines has 3 variants based on size - the MK 62, MK 63, and MK 65. The MK 62 and MK 63 (500 lb. and 1000 lb.) QS are created by adding mine hardware to the MK 82 and MK 83 general purpose bomb (respectively) to form a mine. The MK 65 (2000 lb.) QS consists entirely of hardware designed for use as a mine. The Mod 0, 1, and 3 variants utilize various Target Detection Devices (TDD). The QS Mod 3 utilizes a newly developed TDD, MK 71, a software-programmable device capable of being programmed to optimize detection of new threats. For the QUICKSTRIKE MK 62 and 63, the QS Mod 3 Kit consists of the TDD (including the service and dummy MK 71), Safe/Arming (S&A) devices (including the service MK 75, practice MK 81, and dummy MK 84), battery (MK 176), TDD Adapter Ring MK 163, and miscellaneous hardware. For the QUICKSTRIKE MK 65, the Mod 3 Kit consists of the TDD (including the service and dummy MK 71), the existing S&A devices (including the service MK 45, and practice and dummy S&A devices), the existing batteries MK 131 or 132, TDD Adapter MK 157, and miscellaneous hardware. Additional support hardware for the QS MK 62/63/65 Mod 3 includes Test Set MK 650 and Programmer MK 11. Data Recorders: Mine data recorders record mine target detection and mine fire data during in-water reliability testing. Current recorders are no longer supportable and cannot be used with the Quickstrike Mod 3. New recorders will work with the programmable TDD MK 71 used in the Mod 3. They will support in-water testing of all in-service Quickstrike Mods (0, 1, and 3).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

The Torpedo Support equipment account procures various 4T and associated torpedo components required to ready weapons for Surface Ships, Submarines, Fixed Wing and Rotary Wing to achieve and maintain a readiness posture sufficient to provide Anti-Submarine Warfare (ASW) and Anti-Surface Warfare (ASUW) readiness. The objective of this line is to provide the Fleet with ready exercise weapon for conducting training maneuvers which involves actually firing the torpedoes and to maintain warshot inventories in an operational ready-for-issue (RFI) status in support of combat ready deployment by ASW forces.

[P40A / F8001 - LWT SUPPORT EQUIPMENT]: LIGHTWEIGHT (LWT) Support Equipment procures 4T components to support: (1) 80 Exercise torpedo builds per year for Fleet Proficiency Surface Command Course and Tactical Development firings; (2) Warshot torpedo maintenance to sustain the Fleet with an inventory of RFI warshot torpedoes as they come due for maintenance (100 builds per year); (3) MK-54 Modernization Pipeline output to support final assembly of production MK-54 forebodies; (4) 40 Vertical Launch Anti-Submarine Rocket (ASROC) (VLA) Warshot and Exercise missile assemblies per year; and (5) Various air launch frame assemblies to support Fleet loadout. LWT 4T Components include the following: seawater batteries, pressure cylinders, thermal batteries, fuel shutoff valves, gas generator assemblies, igniters, containers, lanyard start assemblies, electrical initiators, suspension bands, VLA assembly kits, and propeller baffles.

[P40A / F8002 LIGHTWEIGHT OTHER EQUIPMENT INVESTMENT]: LIGHTWEIGHT Other Equipment Investment procure, install, and support Engineering Change Proposal/Ordinance Alteration (ECP/ORDALT) material required for Support and Test Equipment and to retrofit torpedoes and 4T components to the latest RFI configuration.

[P40A / F8003 LIGHTWEIGHT RECOVERABLE EXERCISE TORPEDO (REXTORP)]: Provides for the procurement of MK54 REXTORPs. REXTORPs provide a reusable exercise torpedo for fixed wing, rotary, and surface launched platforms in support of Fleet ASW training and readiness.

[P40A / F8830 LIGHTWEIGHT PRODUCTION ENGINEERING - IN HOUSE]: Provides for production support services at Naval Undersea Warfare Center (NUWC) Divisions Keyport/Newport (KPT/NPT) including program planning, funds management, budgeting, data management, acquisition engineering, software management, Integrated Logistics Support (ILS) and Government-Furnished Equipment (GFE) management, training equipment and configuration management.

MDAP/MAIS Code(s):																			
[P40A / F8840 - LIGHTWEIGHT QUALITY ASSURANCE]: Provides material costs associated with failure analysis and site investigations for Torpedo System component failures and product quality assurance (QA), and critical unique firing tests.																			
[P40A / F8860 - LIGHTWEIGHT ACCEPTANCE TEST AND EVALUATION]: Provides support for acceptance testing of LWT 4T components.																			
[P40A / F8900 - LIGHTWEIGHT PRODUCTION ENGINEERING - CONTRACTOR]: Provides for production support services including program planning, funds management, budgeting, and data management.																			
[P40A / F8100 - HEAVYWEIGHT EXERCISE AND EXPENDABLES AND COMPONENT REPLACEMENT]: Heavyweight (HWT) Exercise and Expendables and Component Replacement procure 4T components to support: (1) Exercise torpedo builds for Fleet Proficiency Submarine and Surface Command Course and Tactical Development firings (600 HWT torpedo exercise builds per year); (2) Warshot torpedo maintenance to sustain the Fleet with an inventory of RFI warshot torpedoes as they come due for maintenance (200 HWT builds per year); and (3) Assembly of modernized MK-48 Mod 7 components back to an All-Up-Round (AUR) configuration, either Exercise or Warshot. HWT 4T Components include the following: wire coils, flex hoses, Otto Fuel, igniters, propellant, A-cables, A-cable inserts, A-cable receptacles, cylinder barrels, exercise fuel tanks, containers, and chamber and valves.																			
[P40A / F8101 - HEAVYWEIGHT OTHER EQUIPMENT INVESTMENT]: Heavyweight Other Equipment Investment procure, install, and support ECP/ORDALT material required for Support and Test Equipment and to retrofit torpedoes and 4T components to the latest RFI configuration.																			
[P40A / F8843 - HEAVYWEIGHT QUALITY ASSURANCE]: Provides material costs associated with failure analysis and site investigations for Torpedo System component failures and product QA, and critical unique firing tests.																			
[P40A / F8833 - HEAVYWEIGHT PRODUCTION ENGINEERING - IN HOUSE]: Provides for production support services at NUWC Divisions KPT/NPT including program planning, funds management, budgeting, data management, acquisition engineering, software management, ILS, and GFE management, training equipment, and configuration management.																			
[P40A / F8863 - HEAVY WEIGHT ACCEPTANCE TEST AND EVALUATION]: Provides support for acceptance testing of HWT 4T components.																			
[P40A / F8893 - HEAVYWEIGHT PRODUCTION ENGINEERING - CONTRACTOR]: Provides for production support services including program planning, funds management, budgeting, and data management.

Justification:

UNCLASSIFIED

Exhibit P-40, Budget Item Justification Sheet: PB 2014 Navy		Date: April 2013
Appropriation / Budget Activity / Budget Sub Activity: 1507N: Weapons Procurement, Navy / BA 03: Torpedoes and Related Equipment / BSA 3: Support Equipment		P-1 Line Item Nomenclature: 3301 - Torpedo Support Equipment
ID Code (A=Service Ready, B=Not Service Ready) : A	Program Elements for Code B Items:	Other Related Program Elements:
MDAP/MAIS Code(s): <p>After a torpedo is fired during a training exercise it is recovered and all expendable components such as batteries, cables, igniters (as well as various accessories required for air-launched torpedoes), must be replaced. These items as well as components such as exercise heads, fuel tanks and exhaust valves which may be used more than one time, but which are worn out or lost in service, are procured each fiscal year in quantities dependent upon the Fleet training requirements and tempo of operations. The torpedoes requiring support are the MK-46 Mod 5A(SW); MK-48 Mod 6 (ACOT) and 7; and MK-54.</p> <p>An increase in funding in FY14 is required to procure components necessary to reconstitute Heavyweight Torpedo (HWT) Guidance & Control systems that were "salted". These procurements will return torpedoes taken out of service back to the warshot inventory. Furthermore, material costs have tripled since 2005, primarily due to the age of the Heavyweight torpedo and spares, which entered service in 1986. However, material cost increases have stabilized at 5% per year over the last 3 years, which is the inflation rate used for the FY14 projection.</p> <p>Additionally \$3.4M will be used to procure HWT Automated Test Equipment (MK710), to replace the aging MK660 test sets. This equipment is required at the maintenance activity in order to test the torpedo before it is returned to Fleet inventory as a warshot or exercise torpedo.</p>

Footnotes:
 (1) Material costs have tripled since 2005, primarily due to the age of the Heavyweight torpedo and spares, which entered service in 1986. However, material cost increases have stabilized at 5% per year over the last 3 years, which is the inflation rate used for the FY14 projection.

"A" in the Delivery Schedule indicated the Contract Award Date.
Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description: The Anti-Submarine Warfare (ASW) Range Program provides training range equipment and Fleet equipment for use on the Navy's underwater ranges. This equipment is used to instrument Fleet exercises and torpedo firings and ASW readiness assessment testing. The Weapon Fleet training ranges include: Southern California Offshore Range (SCORE), Barking Sands Tactical Underwater Range/Barking Sands Underwater Range Extension (BARSTUR/BSURE) and Atlantic Underwater Test and Evaluation Center (AUTEC).</p> <p>[P40A / F4001 - UTRE/PINGER EXERCISE EQUIPMENT (S05)]: Pinger Exercise Equipment is placed in weapons and other underwater vehicles for tracking during training and Test and Evaluation (T&E) exercises, and to ensure safe operation and movement of all craft and weapons on the ranges for the Underwater Tracking Range Equipment (UTRE)/Pinger Program. Funding is used to procure equipment for T&E exercises in addition to improvement and modernization projects.</p> <p>[P40A / F4005 - MK30 COMPONENTS (SUBS)]: The ASW Target MK 30 provides essential fleet ASW training on the Navy's underwater tracking ranges. The MK30 Mod 1 is currently used at BARSTUR - Hawaii, AUTEC - Bahamas, and SCORE. The MK30 Mod 2 is currently used at BARSTUR - Hawaii. ASW range support funds are used to procure components for the MK 30 that are consumed/expended during fleet in-water runs.</p> <p>[P40A / F4006 - STATIONARY TARGET EQUIPMENT MK28 (S05)]: The stationary target equipment includes the MK 28 Targets and all equipment used for conducting Service Weapons Tests (SWT) on in-service and advanced war-shot torpedoes. The SWT is the only test the Navy has to verify the explosive train of heavyweight torpedoes. Funding is used to procure target systems and equipment for Service Weapon Tests in addition to improvement and modernization projects.</p> <p>[P40A / F4830 PRODUCTION ENGINEERING]: Funds for Production Engineering efforts performed by a field activity or contractor during the production phase of these projects. (S05)</p> <p>Production Engineering funds support for Configuration Management, Manual Change Requests, Engineering Change Proposals (ECPs), Software changes, test equipment changes, and obsolescence engineering as performed by the field activities for the MK30 program. In FY13 President's Budget, POM-13, the Navy provided additional funding in FY13 to address additional engineering support and technical expertise to address obsolescence issues with MK30 Target Programs.</p>

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: First Destination Transportation (FDT) provides for the movement of newly procured weapons related equipment and material from the contractor's plant to the initial point of receipt for subsequent shipment to its destination. Prior to FY2014, all funds were allocated to and managed by Naval Supply Systems Command (NAVSUP). Starting in FY2014, funds have been decentralized for allocation, management and oversight by the following commands: Naval Air Systems Command (NAVAIR), Naval Sea Systems Command (NAVSEA), and Strategic Systems Programs(SSP).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

Quantities of weapons procured with the above funding are to meet small arms allowances and inventory objectives. This line item provides for initial issue procurement, modernization, standardization and stock replenishment procurement of a wide variety of small arms and weapons (caliber .50 and below), including required gun mounts and associated support components. This line also provides for procurement of sufficient types and quantities of weapons to support training, security afloat and shore missions of approximately 1,300 ship/ashore activities Navy-wide.

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description: Phalanx Close-In Weapon System (CIWS) is an autonomous combat system that searches, detects, tracks (radar and electro-optic), and engages threats with a 20mm Gatling gun capable of firing 4,500 tungsten penetrator rounds per minute. Integral to ship self-defense and the anti-air warfare "defense-in-depth" concept, CIWS provides terminal defense against anti-ship missiles and high-speed aircraft penetrating other fleet defenses. Phalanx CIWS can operate autonomously or be integrated with a ship's combat system.</p> <p>The Block 1B configuration provides further defense against asymmetric threats such as small, fast surface craft, slow-flying fixed- and rotary-winged aircraft, and unmanned aerial vehicles through the addition of an integrated Forward-Looking Infra-Red (FLIR) sensor. Block 1B also incorporates an optimized gun barrel (OGB) for tighter ordnance dispersion. Enhanced Lethality Cartridges (ELC) can be used with the OGB for improved target penetration.</p> <p>[P40A / DT001 CIWS BLOCK 1B]: This line is an upgrade/conversion to CIWS incorporating a stabilized thermal imager and an automatic acquisition video tracker that provides the additional capability to engage small, high speed, maneuvering surface craft and low, slow aircraft and helicopters. The thermal imager also improves performance against Anti-Ship Cruise Missiles by providing more accurate angle tracking information to the fire control computer. CIWS Block 1B is scheduled to be installed on the following ship classes: CGs, CVNs, DDGs, FFGs, LCCs, LHAs, LHDs, LPDs, LSDs, WMSLs and trainers. The installations will be completed during a limited availability by Shipalt/AIT.</p>

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

There are 229 shipboard systems, 4 trainers and 3 EDM/PCI mounts procured in the Program of Record. This budget provides for installation of 4 WMSLs and 2 CG-71 systems procured under separate budget line items. This budget also provides for the installation of two LSD systems reconstituted from decommissioned assets.

Additional funding has been provided for Block 1B Baseline 2 Radar Upgrades. This is new state of the art digital radar that provides improved performance and increased reliability. It mitigates 200 obsolete components inherent in the existing analog radar by introducing advanced COTS-based signal processing coupled with new low noise signal source. It provides a 2x sensitivity increase along with expanded Doppler (velocity) coverage required for detection and tracking of advanced ASCM and asymmetric threats, provides a 10% increase in system level reliability and provides a 15% reduction in sailor man-hours required for CIWS planned system maintenance. This was previously included in the ECP/ORDALT line and now is shown separately.

Additional funding has been provided for CIWS Reliability, Maintainability and Availability (RM&A) roadmap that will provide system improvements and allow time between Class "A" overhauls to be extended while still maintaining an acceptable operational availability (Ao). The RM&A improvements initially include the following: Coolant Pump with Improved Impeller, Long-life Gyros, TMCU Improvement, Built-in-Test Equipment (BITE) Control Circuit Card Assembly (CCA), Waveguide Air Dryer System (WADS) Piston Compressor, WADS Water Separator, Gun and Ammunition Handling System (GAHS) Chuting, Gun Cradle Cable Assembly, Main Cable Reliability Improvements, and Resolver Improvements. These RM&A improvements will be installed during overhauls, standalone shipboard Alteration Installation Team (AIT) installations and by attrition.

^{##} The FY 2014 OCO Request will be submitted at a later date												
Description: The CIWS Block 1B Baseline 2 RUG Kit is required for CGs, CVNs, DDGs, FFGs, LCCs, LHAs, LHDs, LPDs, LSDs and WMSLs platforms. The CIWS Block 1B Baseline 2 RUG kit is new state of the art digital radar that provides improved performance and increased reliability. It mitigates 200 obsolete components inherent in the existing analog radar by introducing advanced COTS-based signal processing coupled with new low noise signal source. It provides a 2x sensitivity increase along with expanded Doppler (velocity) coverage required for detection and tracking of advanced ASCM and asymmetric threats, provides a 10% increase in system level reliability and provides a 15% reduction in sailor man-hours required for CIWS planned system maintenance. [Block 1B Baseline 2 Radar Upgrades] FY11 there are no install costs as the 37 RUG kits are being installed into mounts at the contractor facility prior to fleet installation. FY12 there are no install costs as the 28 RUG kits are being installed into mounts at the contractor facility. FY13 there are no install costs as the 17 RUG kits are being installed into mounts at the contractor facility. FY14 starts pier side installations. FY14 install costs are for 40 RUG Kits, 11 of the planned 51 are no installation cost as RUG Kits are being installed into mounts. FY15 install costs are for 37 Rug Kits. FY16 install costs are for 38 RUG Kits, 1 of the planned 39 is no cost as the RUG Kit is being installed into mounts. FY17 install costs for 10 RUG Kits. Radar Upgrade Kit unit costs in FY13 and out vary due to different starting configurations of the mounts to be upgraded. There is a mixture of Block 1B Baseline 0 to Block 1B Baseline 2 and Block 1B Baseline 1 to Block 1B Baseline 2 configurations. We need to procure the mix of kits to support the mix of mounts configurations in the Fleet. Of the 38 planned procurements in FY13, 25 are Block 1B Baseline 1 to Block 1B Baseline 2 configurations, 13 are Block 1B Baseline 0 to Block 1B Baseline 2 configurations. Of the 38 planned procurements in FY14, 25 are Block 1B Baseline 1 to Block 1B Baseline 2 configurations, 13 are Block 1B Baseline 0 to Block 1B Baseline 2 configurations. Of the 38 planned procurements in FY15, 25 are Block 1B Baseline 1 to Block 1B Baseline 2 configurations, 13 are Block 1B Baseline 0 to Block 1B Baseline 2 configurations. Of the 10 planned procurements in FY16, 5 are Block 1B Baseline 1 to Block 1B Baseline 2 configurations, 5 are Block 1B Baseline 0 to Block 1B Baseline 2 configurations.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

The Block 1B Surface Mount includes the addition of a Thermal Imager, an Automatic Acquisition Video Tracker and Stabilization System for the Tracker, the upgrade is essential to provide the Fleet capability against small high speed surface threats and low speed air threats.

[CIWS Block 1B] Installation schedule reflects the installation and the CIWS Block 1B and the modification Kits CIWS Block 1B Conversion Upgrade. These 2 cost elements are incorporated into the mount at the factory and the complete mount is installed. Increased ECP procurement starting in FY09 is to accommodate Amphibious AAW Self-Defense Probability of Raid Annihilation (PRA) improvements and backfit of Block 1B Baseline 2 Radar Upgrade capabilities on all CIWS Block 1B hulls. The Installation schedule includes 229 shipboard systems in the Program of Record (POR) and an additional 4 Coast Guard Maritime Security Cutter, Large (WMSL) and 2 CG-47 TICONDEROGA class systems procured under separate budget items. This budget also provides for the installation of two LSD systems reconstituted from Decommissioned assets. DSA is design service allocation. 3 unit in the program of record are an Engineering Development Module (EDMs) and are not installed. Production Lead time for Systems procured in FY11 and out is 31 months. This change is based on fulfilling emergent Army and Navy requirements. Production Lead times for systems procured prior to FY11 varies between 22 months and 31 months as the OEM level loads the factory.

<p>[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012</p> <p>^{##} The FY 2014 OCO Request will be submitted at a later date</p> <p>Description: The Coast Guard Equipment line funds the Coast Guard Combat System Suite for USCG cutters under the Coast Guard Surface Asset Acquisition Program. Under inter-service agreement (delineated in OPNAVINST 4000.79B), DON plans, programs, and budgets for specific Navy military equipment, systems and logistic support requirements for Coast Guard units to ensure the Coast Guard is prepared to execute naval warfare tasks in consonance with US Navy units. Ship construction and installation costs are funded under the Department of Homeland Security appropriation.</p> <p>The Combat Systems and Weapons Suite will be aligned with future Naval ship building programs to support commonality among the two Service's systems and meet National Fleet objectives. The Combat System Suite must compliment and integrate with Navy Combat Systems. The suite is an appropriate balance of equipment to ensure the Coast Guard is prepared to accomplish the assigned Naval Warfare Tasks in concert with US Navy units. The Surface Asset Acquisition Program Combat Suites include the following:</p> <p>[P40A / CG002 MK 110]: Provides the MK 110 gun to engage surface threats, independently or in cooperation with other forces, achieving mission kill on high-speed coastal patrol craft beyond small and intermediate caliber gunfire effective range. Includes equipment procurement and recurring engineering for WMSL and Offshore Patrol Cutter (WMSM) in accordance with OPNAVINST 4000.79B and the Naval Operational Capabilities (NOC) document.</p> <p>[P40A / CG003 MK 160]: Provides MK 160 Mod 12 Gun Computer System, including equipment procurement and recurring engineering, for the WMSL and WMSM Classes to plan and direct surface threat engagements including the capability to fire warning shots, disabling fire and achieve mission kill against these threats in accordance with National Fleet Policy, OPNAVINST 4000.79B, and the NOC.</p> <p>[P40A / CG004 MK 38 MOD 2]: Provides MK 38 Mod 2 Machine Gun System, including equipment procurement and recurring engineering, to plan and engage surface threats, achieving missions kill on high speed patrol craft beyond minor caliber gunfire effective range on the Fast Response Cutter (WPC) in accordance with OPNAVINST 4000.79B and the NOC. The MK 38 Task Force Defense (TFD) capability upgrade will become a part of the production line starting in FY2014. It includes an improved topline, the addition of a co-axial gun and a loud-hailer. The MK38 TFD capability upgrade provides a near and mid-term improvement to address ship based, close range solutions for Fast Attack Craft (FAC)/Fast Inshore Attack Craft (FIAC) Counter-Swarm.</p> <p>[P40A / CG005 COMBAT SYSTEM INTEGRATION]: Ensure successful integration and system interoperability of Navy type equipment that affects the Combat System of US Coast Guard cutters.</p>

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

The Coast Guard Weapons line funds the Coast Guard Combat System Suite for USCG National Security Cutters (WMSLs) and Fast Response Cutters (FRCs) being constructed under the Coast Guard Surface Asset Acquisition Program. Under inter-service agreement (delineated in OPNAVINST 4000.79B), DON plans, programs, and budgets for specific Navy military equipment, systems and logistic support requirements for Coast Guard units to ensure the Coast Guard is prepared to execute naval warfare tasks in consonance with US Navy units.

Funding in FY14 has been adjusted from the FY13 President's Budget position to align procurements with Coast Guard in-yard need dates.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

Description:

Gun Mount Mods supports various types of Gun Weapon Systems and sub-system modifications and upgrade requirements.

[P40A / E5002 MEDIUM CALIBER GUN MODS]: Medium Caliber Gun Mounts (MK110 57mm or MK75 76mm) are installed on FFG, LCS, and WMSL cutters and land based training/test units. The gun mounts provide an Anti-Surface Warfare and Anti-Air Warfare capability for outfitted ships. Funds procure Ordnance Alterations (ORDALT kits), and provide ILS support and production engineering for system improvements that affect safety, reliability and maintainability.

[P40A / E5006 MINOR CALIBER GUN MODS]: Minor Caliber Gun Mounts (MK 38 MOD _ or MK 46 MOD _) are installed on AS, CVN, CG, DDG, LSD, LPD, LHA, LHD, FFG, PC, USCG PB, LCC, MK VI Patrol Boats and land based training/test units. The gun mounts provide an Anti-Surface Warfare and Anti-Air Warfare capability for outfitted ships. Funds procure Ordnance Alterations (ORDALTs kits), and provide ILS support and production engineering for system improvements that affect safety, reliability and maintainability.

[P40A / E5011 MAJOR CALIBER GUN MODS]: The 5-Inch MK 45 MOD _ Gun Mounts are automated, lightweight, single-barrel gun mounts that provide Naval Gun Fire against Surface, air and shore targets. The MK45 is installed on CG 47 and DDG 51 Class surface ships and land based training/test units. Funds procure Ordnance Alterations (ORDALTs kits), and provide ILS support and production engineering for system improvements that affect safety, reliability and maintainability.

[P40A / E5001 MK45 MODS 1&2]: Funding was realigned to E5011.

[P40A / E5004 MK45 MOD 4]: Funding was realigned to E5011.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:
 Funding increase supports the Task Force Defense (TFD) capability upgrade, which will incorporate a co-axial gun, a loud hailer, and an advanced toplit into the MK38 MOD _ . The upgrade provides a near and mid-term improvement to address ship based, close range solutions for Fast Attack Craft (FAC)/Fast In-shore Attack Craft (FIAC) Counter-Swarm. Beginning in FY 2014, the TFD capability upgrade will begin backfit into the current Fleet population and will cut into the forward-fit gun kit production line.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012 ^{##} The FY 2014 OCO Request will be submitted at a later date Description: Modernized CG47 Class ships will operate independently, or as units of Carrier Strike Groups and Surface Action Groups, in support of Underway Replenishment Groups and the Marine Amphibious Task Forces in multithreat environments that include air, surface and subsurface threats. These ships will respond to Low Intensity Conflict/Coastal and Littoral Offshore Warfare (LIC/CALOW) scenarios, Joint Missions, as well as open ocean conflicts, providing and augmenting power projection and forward presence. In addition, these ships will conduct Air Dominance, Land Attack and Force Protection missions. [P40A / CC002 - MK 45 GUN MOUNTS]: Provides MK 45 Gun Mounts for all CG Modernization Availabilities including equipment procurement, non-recurring and recurring equipment engineering, equipment integration, and Integrated Logistics Support (ILS). The MK 45 Program features a rotatable pool of modified assets from decommissioned Spruance Class destroyers as well as new MK 45 compatibility kits that will be applied to the CG Mod Program. Use of these assets to fill a portion of the requirement lowers the procurement unit costs for the years affected.

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

Airborne Mine Countermeasures (AMCM) Equipment is currently used by MH-53E helicopters to counter the threat of sea mines. The MH-60S helicopter will be adapted for the AMCM mission in support of the development of an Organic Fleet AMCM program. The equipment is divided into three categories -- minesweeping, minehunting and mine neutralization. (1) Minesweeping is performed by mechanical or influence sweeps. In mechanical sweeping, the mine mooring is severed by the sweep gear allowing the mine to float to the surface where it is destroyed. In influence sweeping, a magnetic or acoustic field which simulates the magnetic/acoustic signature of a ship is introduced into the water. This field causes the mine mechanism to actuate. (2) In mine hunting, the objective is to actually locate, identify and classify mine like objects (usually by means of high resolution sonar). (3) Then neutralize mines using explosive devices. Their mission is to locate, classify, identify, and neutralize surface, moored and bottom mines.

[P40A / AM065 - UNIT COST - AMNS NEUTRALIZER]: Airborne Mine Neutralization System (AMNS)

AMNS will provide the MH-60S helicopter with the capability to neutralize bottom and moored mines using an expendable mine neutralization device. The AMNS is being tested on MH-53E helicopter to prove out the neutralization effectiveness. The system will be deployed from the MH-60S helicopter as part of the Littoral Combat Ship (LCS) Mine Warfare MissionModule. This capability will be of critical importance in littoral zones, confined straits, choke points, and the Amphibious Objective Area (AOA).

AMNS procurements will be funded by: OPN for the AMNS combat system. WPN for AMNS neutralizer.

[P40A / AM081 COUNTERMEASURE SYSTEM (CMS)]: The Countermine System (CMS)

CMS uses a precision guided, stand-off munition to neutralize mines deployed within the surface and beach zones. The CMS attacks surface laid and buried mines through a controlled dispense of thousands of countermine penetrators. These penetrators are designed to penetrate mines. The penetrators will either consume the explosive fill or cause a detonation of the mine. The CMS is programmed prior to launch and is guided to the desired aim-point using the Joint Direct Attack Munition (JDAM) guidance kit. The CMS munition will be capable of delivery by Air Force (AF) and Navy (USN) tactical aircraft (TACAIR).

[P40A / AM085 MINE NEUTRALIZATION SYSTEM]: Mine Neutralization System (MNS)

MDAP/MAIS Code(s):

MNS is a mine identification and neutralization system for support of mine clearance operations from the MCM-1 Avenger Class ship(s) for both bottom and moored mines. It will replace the aging and maintenance intensive AN/SLQ-48 Mine Neutralization System. MNS will provide the MCM ships with improved reconnaissance capability, positive identification of the mine threat, reduced neutralization mission times, and reduced maintenance in both time and required spares.

"A" in the Delivery Schedule indicated the Contract Award Date.

Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 99,999, all quantities are shown as each. If the maximum quantity is between 100,000 and 99,999,499 all quantities are shown in thousands (rounded to the nearest thousand). If the maximum quantity is greater than 99,999,499 all quantities are shown in millions (rounded to the nearest million).

[#] FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

^{##} The FY 2014 OCO Request will be submitted at a later date

Description:

This budget activity provides all WPN Spares funding formerly separately identified in the other WPN budget activities. The procurement of spares and repair parts and assemblies for WPN equipment requiring support by the acquisition activities prior to the Navy Supply System Material Support Date is outlined below for Initial and Vendor Direct spares.

Item Schedule		ID CD	Prior Years			FY 2012			FY 2013			FY 2014 Base			FY 2014 OCO			FY 2014 Total		
Item Nomenclature*	Exhibits		Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)	Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)	Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)	Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)	Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)	Unit Cost (\$)	Qty (Each)	Total Cost (\$ M)
WPN spares	P18				-			44.114			60.150			52.632			-			52.632
Total Gross/Weapon System Cost					0.000			44.114			60.150			52.632			-			52.632

*Item Nomenclature represents Item Number, DODIC, and Item Name for the P40A and P5; Name for the P18 and P23; Modification Number and Modification Title for the P3A; Item Number and Item Name for the P10.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

Spares funding is required for the initial outfitting and repair of missiles or components which fail or are damaged while in the Fleet, and for expendable items, such as guided missiles and non-recoverable target drones. For recoverable target drones, additional spares and repair parts are required to repair damage incurred in flight and recovery operations, and for control and telemetry equipment.
