<sup>#</sup> FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

<sup>##</sup> The FY 2014 OCO Request will be submitted at a later date

## A. Mission Description and Budget Item Justification

The Joint Experimentation (JE) Program Element provides funding for the Department's Joint Concept Development & Experimentation (JCD&E) effort, carried out by the JCD&E Community.

The JCD&E Community is comprised of the Combatant Commands, Services, the Office of the Secretary of Defense (OSD), the Joint Staff, the National Guard Bureau (NGB), the United States Coast Guard (USCG) and several Defense agencies. Intra-government agencies and coalition partners often participate in JCD&E processes and projects. The Director for Joint Force Development (DJ-7) leads the joint force development efforts on behalf of the Chairman. The J-7 staff coordinates all efforts with respect to the JCD&E Community.

To ensure the program focuses on needs of the warfighters, JCD&E initiatives originate from an annual call for nominations from combatant commands and Services, and from assessment of combatant command identified critical warfighting capability gaps articulated in the Comprehensive Joint Assessment (CJA). JCD&E project submissions undergo preliminary analysis by the JCD&E Community to confirm suitability for experimentation and, where feasible, to associate closely related subjects for economy of effort. Preliminary analysis also confirms alignment to the Chairman's priorities for developing Joint Force 2020 and Defense Planning Guidance (DPG) strategic priority areas. The resultant annual list of project submissions includes concepts for development and experimentation efforts eligible for design and execution. These efforts are prioritized and approved by the combatant command and Service members of the Synchronization Board and forwarded to the JCB/JROC for approval.

JCD&E activities examine potential solutions for combatant command operational needs emphasizing non-materiel solutions through targeted Doctrine, Organizational, Training, Leadership and Education, Personnel, Facilities, and Policy (DOT\_LPF-P) improvements. JCD&E tackles joint concept and capability issues demanding sophisticated analysis, innovative design and complex execution. JCD&E projects address topics that would prove difficult for individual combatant commands and Services to capture in the context of their immediate operational and force generation responsibilities. In partnership with the combatant commands and Services, JCD&E mitigates operational risk by establishing procedural models to conduct emergent concepts that are not yet instantiated in conventional force generation. The results are briefed to Functional Capability Boards who integrate solutions into their functional investment plans.

Funding will be distributed to meet requirements, retaining the flexibility to develop field-sustainable joint capabilities that may be required to meet future, unforeseen challenges.

Change Summary Explanation							
The Chairman, Joint Chiefs of Staff has directed the J7 to transform the Joint Experimentation program. The reduction in funding between FY2013 and FY2014 is part of the transformation from Joint Experimentation to a Joint Assessment program.							
FY2014 efforts will focus on supporting the President’s “Sustaining U.S. Global Leadership Priorities for the 21st Century Defense” with emphasis on implementing the Joint Operational Access Concept, and building Joint Force 2020 as described in the Chairman Joint Chiefs of Staff Capstone Concept for Joint Operations. Specific work will focus on concepts, and gap analysis and the resultant recommended non-materiel solutions that will improve current and future joint force capability including operating in anti-access and area denial environments, joint command & control, intercontinental missile defense, counterterrorism, operations in space, and defeating threats in all domains, including cyber.

**A. Mission Description and Budget Item Justification**

This program element is new to the Joint Staff and funds the continued management, advanced research and development and prototype evaluation of Homeland Surveillance technologies with the goal of improved Joint Integrated Air and Missile Defense in the homeland. Additional details of the program are classified.

FY14 activities include, but are not limited to, advanced technology development, program management and those efforts to support transition of the program to the U.S. Air Force in FY2015.

This program is in Budget Activity 4, Advance Component Development and Prototypes (ACD&P) because efforts are necessary to evaluate integrated technologies, representative modes or prototype systems in a high fidelity and realistic operating environment.

Details of this project are classified.

**A. Mission Description and Budget Item Justification**

In support of the Chairman's responsibility for the assessment of the capability and adequacy of United States forces to successfully execute the national military strategy the Joint Systems Integration (JSI) Program Element provides mission funding for the Joint Staff J6 C4 Assessments Division (C4AD). C4AD conducts interoperability assessments and develops solutions/recommendations to improve integration of Service, Defense Agency, and coalition systems.

C4AD's Persistent Command and Control Environment replicates an operational environment and provides Combatant Commands, Services, Agencies and Coalition partners at the joint force headquarters level, a laboratory and assessment venue for the warfighter and capability developer to identify and solve interoperability and integration issues with current and near-term joint and coalition capabilities. With this capability, C4AD assesses system of systems interoperability, operational capability, procedural compliance and technical suitability of emerging and existing systems and programs to confirm readiness for deployment.

By establishing ground truth for interoperability and suggesting remedies for demonstrated shortfalls, C4AD is an enabler for the Chairman's priorities to: pioneer new ways to combine and employ emergent capabilities, drive Jointness deeper, sooner in capability development, move quickly toward Joint information and simulation networks that support secure and agile command and control, expand the envelope of interagency and international cooperation, and promote multilateral security approaches and architectures.

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
In support of the Chairman’s responsibility for the assessment of the capability and adequacy of United States forces to successfully execute the national military strategy the Joint Systems Integration (JSI) Program Element provides mission funding for the Joint Staff J6 C4 Assessments Division (C4AD). C4AD conducts interoperability assessments and develops solutions/recommendations to improve integration of Service, Defense Agency, and coalition systems.												
C4AD's Persistent Command and Control Environment replicates an operational environment and provides Combatant Commands, Services, Agencies and Coalition partners at the joint force headquarters level, a laboratory and assessment venue for the warfighter and capability developer to identify and solve interoperability and integration issues with current and near-term joint and coalition capabilities. With this capability, C4AD assesses system of systems interoperability, operational capability, procedural compliance and technical suitability of emerging and existing systems and programs to confirm readiness for deployment.												
By establishing ground truth for interoperability and suggesting remedies for demonstrated shortfalls, C4AD is an enabler for the Chairman’s priorities to: pioneer new ways to combine and employ emergent capabilities, drive Jointness deeper, sooner in capability development, move quickly toward Joint information and simulation networks that support secure and agile command and control, expand the envelope of interagency and international cooperation, and promote multilateral security approaches and architectures.												
B. Accomplishments/Planned Programs (\$ in Millions)									FY 2012	FY 2013	FY 2014	
Title: Interoperability Assessments (IA) and Interoperability Technology Demonstration Center (ITDC)									0.000	1.276	2.894	
Description: Primary outcome for this effort is seamless interoperability between DoD and coalition C2 systems supporting the warfighter. IA supports the interoperability assessment of systems in five categories: operational, system of systems, technical, software, and procedural. These assessments provide supporting justification for continued development of a program within the acquisition system and resolve capability shortfalls of fielded systems.												
FY 2013 Plans: Continue the efforts initiated for FY 2012 and respond to unpredictable operational issues and shortfalls. Interoperability assessments will be conducted to solve warfighter problems, including coalition challenges. FY 2013 assessment objectives are focused on; Operations and Intelligence Integration, Tactical Edge Integration, Joint Fires Capabilities, Integrated Air Missile Defense, Data Strategy Implementation, and Information Sharing Capabilities.												

**UNCLASSIFIED**

<b>B. Accomplishments/Planned Programs (\$ in Millions)</b>			<b>FY 2012</b>	<b>FY 2013</b>
Tactical Infrastructure Enterprise Services (TIES) JCTD Assessment – Assess the capability of sharing data from authoritative data sources using web services in a C2 Core conformant, standardized data format.				
Joint Cross Domain eXchange (JCDX) Interoperability Assessment – Assess JCDX, a multi-level security capability, to exchange the common operation picture and support record/tactical communications interfaces between U.S. and Coalition forces.				
Italy-U.S. Command and Control Interoperability Assessment – Continue assessing the exchange of C2 data between the U.S. Global Command and Control System Joint (GCCS-J) and the Italian SIACCON (Sistema Automatizzato di Comando e Controllo) system. SIACCON is a distributed C2 system that provides battle management support across a range of functions for the Italian Army.				
<b>FY 2014 Plans:</b> Continue the efforts initiated for FY2013 and respond to unpredictable operational issues and shortfalls. Interoperability assessments will be conducted to solve warfighter problems, including coalition challenges. FY2014 assessment objectives are focused on; Cyberspace, Operations and Intelligence Integration, Tactical Edge Integration, Joint Fires Capabilities, Integrated Air Missile Defense, Data Strategy Implementation, and Information Sharing Capabilities.				
Afghanistan Mission Network (AMN) Coalition Interoperability Assurance Validation (CIAV) Transition and Assessments – AMN is the primary Coalition, Command, Control and Communications and Computers, Intelligence, Surveillance, and Reconnaissance (C5ISR) network for International Assistance Forces (ISAF) in Afghanistan. C4AD is supporting the assessment of Coalition Mission Threads (CMTs) and Coalition Tactics, Techniques and Procedures (CTTPs) to identify and correct ISAF interoperability problems.				
Bold Quest (BQ) 2014 Technical Support and Interoperability Assessments – Assess interoperability and document identified deficiencies of select systems within the joint fires mission thread during BQ 2014 operational venues.				
Digitally-Aided Joint Fires Support and Assessment – Assess the implementation of various messaging standards for Close Air Support (CAS) mission execution.				
Coalition Warrior Interoperability Experiment (CWIX) 2014 Interoperability Assessments – Conduct interoperability assessments between selected systems within the following mission areas; Coalition fires, Coalition Intelligence, Surveillance, Reconnaissance (ISR), and Coalition Ballistic Missile Defense during the CWIX event.

<b>B. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
Terminal Fury 2014 Joint Automated Deep Operations Coordination System (JADOCS) Interoperability Assessment – Assess the system interoperability of JADOCS during Terminal Fury 2014.				
C4-Intelligence, Surveillance, Reconnaissance (C4ISR) Interoperability Assessments – Assess interoperability of Service systems to Global Command and Control System-Joint (GCCS-J).				
Unified Cross Domain Management Office (UCDMO) Enterprise Cross Domain Solutions (ECDS) Capability Assessment - Conduct a capability assessment of the specified ECDS, measuring the functional strengths and weaknesses against UCDMO prescribed criteria.				
Mission Partner Environment (MPE) U.S. Development and Assessment and Federated Mission Network (FMN) Development and Support – Provide interoperability assessments of selected U.S. and Coalition systems.				
Network Integration Evaluation (NIE) Facility and Interoperability Assessment Support – Assess potential networked and non-networked capabilities in a robust operational environment.				
Joint Staff J7/J6 Partnership for the Operational Assessment Test (OAT) of the Joint Live Virtual Constructive (JLVC) Modeling and Simulation (M&S) Federation – Assess networked systems as directed.				
Tactical Infrastructure Enterprise Services (TIES) Limited Technology Experiment (LTE) JCTD Assessment – Assess the capability of sharing data from authoritative data sources using web services in a C2 cCore conformant, standardized data format.				
<b>Title:</b> Technical Assessments and Integration (TA&I)		0.000	1.080	2.429
<b>Description:</b> Primary Outcome (objective) for this effort is near-term technical solutions for integration, assessment and delivery of operational capabilities that address near-term operational and tactical requirements. TA&I uses organic laboratory resources, equipment, and technical personnel to integrate emerging technologies.				
<b>FY 2013 Plans:</b> Continue FY 2012 initiatives investigating impacts of technology advances in wireless devices, mesh and ad-hoc networking, satellite modem technology, and small lightweight secure digital capabilities on warfighter command and control capabilities and match emerging critical warfighter requirements with the technologies to identify near-term technology solutions supporting Combatant Commanders. Areas of concentration include Tactical Edge Integration and Joint Command and Control Capabilities.

Joint Command and Control Adaptive Planning and Execution (APEX) Assessment – Integrate a common user interface that allows warfighters to customize their desktop to preference and present capabilities that fit mission needs through cloud computing and enterprise collaboration services.			
<b>Title:</b> Persistent Command and Control Environment		0.000	0.917
<b>Description:</b> The persistent command and control environment provides a reconfigurable Joint Task Force national and coalition laboratory that supports the rapid assessment and integration of existing and emerging C4 capabilities. It is a venue for the Department and allied partners to collaboratively assess capability and interoperability of current and future warfighting systems and when connected with other joint, service, agency, and coalition laboratories provides a robust and tailorable system of systems assessment and engineering environment.			
<b>FY 2013 Plans:</b> Continue FY 2012 initiatives by engaging the Services and Communities of Interest (COI) to leverage the capabilities of the Persistent Command and Control Environment by bringing joint solutions through C4AD's integration and operational assessment process. Also continue to expand existing relationships with Service and Coalition laboratory and engineering organizations.			
C4AD Project Engineering Support – Provide infrastructure, communications, network, information assurance, security, and engineering support as required.			
<b>FY 2014 Plans:</b> Continue FY 2013 initiatives by engaging the Services and Communities of Interest (COI) to leverage the capabilities of the Persistent Command and Control Environment by bringing joint solutions through C4AD's integration and operational assessment process. Provide a comprehensive Joint Task Force (JTF) environment required to also support cyber training, cyber capability development, and cyber assessment by expanding the connectivity and capability of the existing persistent environment to support the Enterprise Cyber Range Environment focused on user requirements, architectures, standards, measures, metrics, instrumentation, and data collection.			
C4AD Project Engineering Support – Provide infrastructure, communications, network, information assurance, security, and engineering support as required.

<b>C. Other Program Funding Summary (\$ in Millions)</b>		
<b>Remarks</b>		
<b>D. Acquisition Strategy</b> C4AD supports interoperability of systems selected for acquisition, integration and fielding. C4AD is a forcing function to discover and provide interoperable joint solutions as a means to foster rapid, near-term insertion of command and control technology by promoting the ability to meet the DoD direction for spiral development and evolutionary acquisition. Services and Defense Agencies are responsible for conducting acquisition activities in Programs of Record (POR).		
<b>E. Performance Metrics</b> FY 2013 Strategic Goals Supported: Chairman's Priorities to "Achieve our National Objectives in our Current Conflicts and Develop Joint Force 2020" by: - Driving resolution of C4 interoperability problems with actionable recommendations stemming from technical and operational demonstrations and assessments of existing and emerging C4 capabilities.  - Integrating and assessing technical solutions that provide gap-filling capabilities to satisfy near-term operational requirements.  - Providing a persistent C4 environment replicating an operational Joint Task Force Headquarters and/or subordinate elements to conduct interoperability, capability, and integration assessments.

<sup>#</sup> FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

<sup>##</sup> The FY 2014 OCO Request will be submitted at a later date

## A. Mission Description and Budget Item Justification

The Joint Deployable Analysis Team (JDAT) mission is to employ scientific methods to research, investigate, test, assess, and evaluate current and emergent Joint command and control (C2) information systems and associated procedures. These activities measure capabilities and limitations, identify shortfalls and root cause, recommend and verify solutions, and validate joint capabilities. The resulting empirical outcomes influence Joint Capability development in areas such as Policy; Joint Doctrine; Tactics, Techniques and Procedures; integration of capabilities; and digital interoperability. JDAT provides decision-quality data and cogent solutions to customers and stakeholders responsible for improving Joint C2 information systems integration and interoperability to inform acquisition decisions and ensure that Services and Agencies field interdependent and interoperable systems.

The emphasis of JDAT assessment efforts is the evaluation of C2 Information Systems and Procedures to provide Services and Agencies findings and recommendations based on quantifiable data in order to improve Joint C2 integration and interoperability. JDAT collects and analyzes data and provides observations, findings, conclusions, and recommendations to identify policy, Joint doctrine, tactics, techniques, and procedures (TTP); and material solutions and products that promote capability improvement. Evaluations range from small, single-focus events to large, multi-event/venue exercises.

Exhibit R-2, RDT&E Budget Item Justification: PB 2014 The Joint Staff		DATE: April 2013		
APPROPRIATION/BUDGET ACTIVITY 0400: Research, Development, Test & Evaluation, Defense-Wide BA 4: Advanced Component Development & Prototypes (ACD&P)		R-1 ITEM NOMENCLATURE PE 0604828J: Joint FIRES Integration and Interoperability Team		
Change Summary Explanation				
C. Accomplishments/Planned Programs (\$ in Millions)		FY 2012	FY 2013	FY 2014
Title: Joint Deployable Analysis Team (JDAT) - Command and Control (C2) Information Systems and Procedures Capability Assessments		0.000	7.364	7.506
Description: JDAT conducts assessments in conjunction with Service and Combatant Command (CCMD) exercises, experiments, and test and evaluation events.				
The primary outputs and efficiencies include: - Improvement in the Services' ability to employ Joint C2 information systems - Recommendations for C2 system integration and interoperability - Ability to define appropriate Joint context during system acquisition or development - Updates/revisions to C2 related Chairman Joint Chief Staff (CJCS) Instructions and Manuals - Development of related Universal Joint Tasks (UJT) and Additional Task Detail (ATD) - Updates and revisions to doctrine, TTP, and Joint publications - Development/refinement of analytical tools (i.e. Data Collection Architecture for Analytical Feedback (DCAAF), Track Event Reconstruction Application (TERA), Joint Windows-based Warfare Assessment Model (JWinWAM)) - Recommended solutions integrated within the Joint Requirements Oversight Council (JROC) Joint Capabilities Integration and Development System (JCIDS) - Identification of specific Key Performance Parameters (KPPs) and Key System Attributes (KSAs) for new systems that meet Joint warfighter operational requirements to ensure Services and Agencies field interdependent and interoperable systems - Increased effectiveness/confidence in combat identification processes and a reduction in fratricide - Increased effectiveness and confidence in C2 information systems and associated procedures				
FY 2013 Plans:				
- Provide analytical support to a Military Utility Assessment of coalition and U.S. C2 information systems and procedures at Bold Quest 13. Provide instrumentation, data collection, data capture, real-time mission monitoring, and feedback to participants via daily debriefings. Benefits will include improved ability to assess various participating coalition and U.S. systems, improved joint task execution, and an effective Military Utility Assessment of U.S. C2 information systems while greatly reducing the timeline required to provide fact-based recommendations.				
- Assist Commander, Operational Test and Evaluation Force (COMOPTEVFOR) with Identification Friend or Foe (IFF) Mode 5 Level 1 Joint Operational Test Approach (JOTA) analysis to validate integration and interoperability of fielded systems. Develop data collection and analysis methodologies, design and implement data collection architectures and conduct analysis requisite to

**A. Mission Description and Budget Item Justification**

The Joint Integrated Air and Missile Defense Organization (JIAMDO) is the organization within the Department of Defense (DoD) chartered to plan, coordinate, and oversee Joint Air and Missile Defense (AMD) requirements, joint operational concepts, and operational architectures. As part of the CJCS staff, JIAMDO supports the Chairman in meeting his Title 10 responsibilities as they relate to air and missile defense issues. JIAMDO serves as the operational community's proponent for characteristics, requirements, and capabilities in air and missile defense, and is the joint air and missile defense resource proponent within the DoD's resource allocation structures. JIAMDO also leads AMD mission area and utility analyses, integrates air and missile defense within the Force Protection joint capability area, and conducts evaluations and demonstrations of joint air and missile defense architectures and concepts.

JIAMDO has established a close partnership with Combatant Commands (CCMDs) and maintains liaison offices at all major CCMD locations to facilitate coordination of integration issues and requirements. In particular, JIAMDO maintains close coordination with US Strategic Command (USSTRATCOM) in support of ballistic missile defense of the U.S. It provides the Chairman, JCS and the Joint Requirements Oversight Council (JROC) the ability to meet statutory responsibilities to review the cost, schedule and performance criteria of Missile Defense Agency (MDA) missile defense programs, and assesses the validity of those criteria in relation to national and military requirements. At the request of USSTRATCOM, and at the direction of the CJCS, JIAMDO supports USSTRATCOM in the conduct of Military Utility Assessments and analysis of the Ballistic Missile Defense System (BMDS). JIAMDO supports the USSTRATCOM mission by ensuring operational and technical requirements are integrated into the theater missile warning architecture. JIAMDO represents the Joint Staff in work on the AMD Capabilities Based Assessment Joint Service Team. JIAMDO also provides direct support to US Northern Command (USNORTHCOM) for homeland air surveillance issues.

Change Summary Explanation					
JIAMDO-Homeland: Programs will be near development completion and conducting Military Utility Assessment, which requires live assets and integration development.					
JIAMDO-Core: The Joint Staff plans to reduce dependence upon contracted advisory and assistance service efforts, and increase leverage upon organic (military and federal civilian) labor.					
FY2014 reduction is due to a both a decreasing resource environment and decreased reliance on contract support.

Title: Core									9.030	22.508	21.767	
Description: Provides overall staff support for JIAMDO operations in the area of ballistic missile defense, air and cruise missile defense and homeland defense. This includes performing analyses, demonstrations, and programmatic assessments of technology, operations, requirements, and weapons systems. In coordination with Services and COCOMs, JIAMDO Core also leads the definition, assessment, development, and approval of Joint AMD Operational Concepts, Operational Architectures, and capability requirements to guide the Department's joint/interagency/combined fully integrated and net-centric capable air defense (including defense against cruise missiles, unmanned aerial vehicles, and ballistic missiles). JIAMDO Core also: • Develops and integrates joint exercises, simulations, war-games, force resource allocations, and interoperability initiatives

A. Mission Description and Budget Item Justification												
The Joint Integrated Air and Missile Defense Organization (JIAMDO) is the organization within the Department of Defense (DoD) chartered to plan, coordinate, and oversee Joint Air and Missile Defense (AMD) requirements, joint operational concepts, and operational architectures. As part of the CJCS staff, JIAMDO supports the Chairman in meeting his Title 10 responsibilities as they relate to air and missile defense issues. JIAMDO serves as the operational community's proponent for characteristics, requirements, and capabilities in air and missile defense, and is the joint air and missile defense resource proponent within the DOD's resource allocation structures. JIAMDO also leads AMD mission area and utility analyses, integrates air and missile defense within the Force Protection joint capability area, and conducts evaluations and demonstrations of joint air and missile defense architectures and concepts.												
JIAMDO has established a close partnership with Combatant Commands (CCMDs) and maintains liaison offices at all major CCMD locations to facilitate coordination of integration issues and requirements. In particular, JIAMDO maintains close coordination with US Strategic Command (USSTRATCOM) in support of ballistic missile defense of the U.S. It provides the Chairman, JCS and the Joint Requirements Oversight Council (JROC) the ability to meet statutory responsibilities to review the cost, schedule and performance criteria of Missile Defense Agency (MDA) missile defense programs, and assesses the validity of those criteria in relation to national and military requirements. At the request of USSTRATCOM, and at the direction of the CJCS, JIAMDO supports USSTRATCOM in the conduct of Military Utility Assessments and analysis of the Ballistic Missile Defense System (BMDS). JIAMDO supports the USSTRATCOM mission by ensuring operational and technical requirements are integrated into the theater missile warning architecture. JIAMDO represents the Joint Staff in work on the AMD Capabilities Based Assessment Joint Service Team. JIAMDO also provides direct support to US Northern Command (USNORTHCOM) for homeland air surveillance issues.

**A. Mission Description and Budget Item Justification**

The Joint Staff Analytical Support (JSAS) family of programs provides defense analytical support capabilities for the CJCS and Combatant Commands (CCMD). JSAS encompasses the developmental tools and infrastructure required to conduct analyses and formulate the results to best assist the Chairman in fulfilling his statutory responsibilities. Key deliverables provided by JSAS include wide-ranging force structure assessments, course of action development for the Joint Force environment, analyses and studies to aid in decision-making, and other analysis efforts to implement timely, low-cost initiatives.

# FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012												
## The FY 2014 OCO Request will be submitted at a later date												
A. Mission Description and Budget Item Justification												
Automates the development of the Global Force Management Implementation Guidance Forces For Unified Commands Memorandum Assignment and Apportionment tables. This will be accomplished using the Automated GFM Tool (AGT) and Collaborative Issue Resolution Tool (CIRT). AGT and authoritative force structure data tagged with Organizational Unique Identifiers (OUID) will be transferred “machine-to-machine” from the Services to AGT. Additionally, AGT development will incorporate force readiness information. The goal is to greatly improve the quality, timeliness, and accuracy of information available to perform Force Management (FM) throughout the Department.												
B. Accomplishments/Planned Programs (\$ in Millions)										FY 2012	FY 2013	FY 2014
Title: Global Force Management Data Initiative (GFM DI)										0.000	0.000	2.097
Description: RDT&E funds for the Global Force Management (GFM) program will enable the Assignment, the Allocation, and the Apportionment functions for forces to meet the requirements set forth in Title 10 U.S.C. and the Unified Command Plan. The development of the Secretary of Defense’s “Forces for Unified Commands” Memorandum Assignment Tables has historically been a labor intensive staffing process conducted annually. The Automated GFM Toolset is the first downstream consumer of force structure data resident in the seven organization (org) servers that are made available by the GFM DI effort. CIRT has streamlined force management, increased common understanding of force assignment, and supported timely force management decisions. The objective is to automate the generation of the Global Force Management Implementation Guidance (GFMIG) and Forces For Unified Commands (Forces For) Assignment, Apportionment and Allocation tables. These efforts will flatten, streamline, and automate the current process while providing high fidelity data and transparency and enhance Combatant Commander risk assessment to operational plans.												
Failure to fund for this effort negatively impacts the ability of the Services, CCMDs, JS and OSD to efficiently manage force structure resources. Without continued funding, the current FY13 Forces For staffing cycle will rely on manual, inefficient, less-timely spreadsheets to develop the Assignment and Apportionment Tables. Additionally, this initially successful CIRT and AGT will fail and negatively impact the use of authoritative force structure data in GFM DI Next Steps.

<sup>#</sup> FY 2013 Program is from the FY 2013 President's Budget, submitted February 2012

<sup>##</sup> The FY 2014 OCO Request will be submitted at a later date

**A. Mission Description and Budget Item Justification**

The Joint Integration & Interoperability (JI&I) Program Element underwrites the Department's core joint Command and Control (C2) efforts for military needs development and validation, for development of associated Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, and Facilities (DOTMLPF), and for operational assessment of materiel solutions proposed and delivered by the Defense acquisition enterprise. Funds from the JI&I Program are used to address joint capabilities including, but not limited to operational through tactical level joint integration of the following capabilities: Common Operational and Tactical Pictures; Combat Identification; Situational Awareness; Adaptive Planning and Execution (APEX); Interoperability among Service/ Agency intelligence systems; Interoperable Joint Fires, Maneuver, and Intelligence; and Integrated Joint Battle Management Command and Control.

Activities funded by the JI&I Program aim to:

- Identify, and/or develop mission capable solutions for COCOM integration and interoperability shortfalls with emphasis on non-materiel elements;
- Assess operational suitability and sufficiency of materiel solutions identified by the Defense acquisition enterprise in response to validated joint C2 needs;
- Provide Combatant Commanders with interoperable combat identification and situational awareness capabilities among United States Interagencies, and Allied and Coalition Forces in support of Overseas Contingency Operations;
- Develop joint requirements supporting C2-intensive joint missions such as Joint Close Air Support and Joint Fires;
- Develop joint integrated architectures that guide service capability mapping to achieve joint interoperability;
- Establish fundamental joint data standards and cross domain solutions to facilitate future system integration and interoperability; and,
- Undertake other activities to resolve emergent operational and tactical needs associated with joint C2.

Change Summary Explanation						
Additional resources allocated to support mission requirements that transitioned to the Joint Staff after U.S. Joint Forces Command disestablishment, and the re-establishment of the Joint Staff J6 Directorate / CIO.						
C. Accomplishments/Planned Programs (\$ in Millions)				FY 2012	FY 2013	FY 2014
Title: Joint Integration & Interoperability				0.000	5.013	12.652
Description: Primary objective is the resolution of C2 warfighter requirements and interoperability shortfalls; development, oversight, and execution of the DoD C2 Strategic and Implementation Plan objectives for: 1) Improved, integrated, interoperable, and networked joint force; 2) Reduction in duplicative C2 systems/programs across the DoD portfolio; and 3) Improved decisions and recommendations regarding capability trade-off investment strategies and development efforts.						
FY 2013 Plans: Lead the requirements definition process and implementation framework necessary to evolve the DoD Future Mission Network (FMN) / Mission Partner Environment (MPE) capability; follow-on to the Afghanistan Mission Network (AMN). Provide oversight and management of integration activities in accordance with JROC-approved FMN / MPE implementation plan to address steady-state and contingency coalition information sharing needs and Combatant Command shortfalls. Provide oversight and management of FY13 joint combat development projects and integration activities: joint C2 requirements definition and prioritization for the JROC, kinetic and non-kinetic (cyber) joint fires capabilities, mission thread architectures and analysis, enterprise data standards and services and operational assessments to optimize C2 portfolio capabilities. Provide a persistent joint environment for test and assessment to address COCOM issues in operational assessments/venues.

<b>C. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
<p>Perform C2 capability prioritization and sequencing via the USD(AT&amp;L)-sponsored Joint C2 Sustainment and Modernization Plan process, with follow-on C2 capability production, integration, fielding and sustainment for FY13-15. Perform the JROC-directed Operational Impact and Risk Assessment of Joint C2 capabilities based on COCOM and Service inputs to inform stakeholders of the current state of joint C2 with respect to the JROC's "Do No Harm" mandate. Sustain and utilize the Net-Enabled Requirements Identification Database (NRID) and the Decision Support Tool (DST) to provide accessibility and visibility into C2 capability needs (gaps, shortfall), defined requirements (old, new, emerging), and potential solutions for C2 stakeholders and decision-makers to consider. Develop JCIDS and requirements documents to sustain the Joint C2 family of programs and lead the way for future joint C2 capability development. Develop requirements for Future Mission Network (FMN) / Mission Partner Environment (MPE) capabilities and consider C2 Doctrine, Organization, Training, Leadership and Education, Personnel, Facilities, and Policy (DOT_LPF-P) solution tradeoffs and recommendations. Develop and/or collaborate on Capability Definition Packages (CDPs) for Global Force Management Synchronization, Concept Development, and Joint Execution Mission Management. Develop Capability Packages (CPs) for Adaptive Planning and Execution Force Projection, Future Mission Network (FMN) / Mission Partner Environment (MPE), and Unclassified Information Sharing Services.</p> <p>Lead the configuration management of C2 Core Version 2.0 and facilitate C2 Core implementation through the Tactical Edge Data Solutions Joint Capability Technology Demonstration and piloting activities with the National Geospatial Agency and the Open Geospatial Consortium. Support DoD CIO development of the DoD Data Framework and DoD adoption of the National Information Exchange Model (NIEM). Lead the NATO C3 Board Information Integration Services Capability Team to facilitate data sharing capabilities with NATO nations. Execute FY 2013 Authoritative Data Source (ADS) Annual Review Board in conjunction with the Joint C2 Sustainment and Modernization Plan process to synchronize data exposure with capability development. Expand the C2 ADS management approach in coordination with all functional capability boards (FCBs. Verify C2 ADS information in the DoD Enterprise ADS Registry and report ADS exposure and utilization metrics to ensure ADS exposures are meeting warfighter requirements. Map ADS to Joint Mission Threads directly supporting warfighter requirements and analysis. Provide data &amp; service strategy reviews and recommendations for ISPs/IAPs, capabilities development documents, and guidance and policy documents to ensure programs are complying with warfighter requirements and policy. Lead the C2 Data and Services Steering Committee to provide a formal process to establish C2 data sharing priorities and standards for C2 capabilities. Maintain oversight of DOD's tactical information exchange standards. Oversee refinement and implementation of the Interoperability Enhancement Process (IEP) to ensure data interoperability in the field.</p> <p>Lead interoperability efforts across DOD and partner nations at operational and tactical level for mission partner operations, fire support, Combat Identification (CID), and Friendly Force Tracking (FFT) capabilities. Function as Secretariat for the Joint Requirements Oversight Council(JROC)-chartered, FOGO-level Joint Fire Support (JFS) and CID/FFT Executive Steering Committees (ESCs)— which focuses Service and NATO/coalition partners on joint and combined solutions to policy, interoperability, doctrine, and tactics, techniques, and procedural (TTP) issues and initiatives. Execute the Director, Joint Staff-</p>

<b>Exhibit R-2, RDT&amp;E Budget Item Justification:</b> PB 2014 The Joint Staff		<b>DATE:</b> April 2013		
<b>APPROPRIATION/BUDGET ACTIVITY</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide</i> BA 7: <i>Operational Systems Development</i>		<b>R-1 ITEM NOMENCLATURE</b> PE 0607828J: <i>Joint Integration &amp; Interoperability</i>		
<b>C. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
<p>approved Bold Quest 2013 assessment demonstration, including a Joint Operational Test for Mark XII Mode 5 Interoperability to support initial operational capability for US forces in 2014; and a long range air defense event to test the air-to-ground integration of Mode 5—meeting long-standing requests by the Navy and USAF. Expand the JROC-directed JFS Joint Mission Thread beyond the “execution phase” to the entire fires support process—increasing systems interoperability and fires execution with materiel and non-materiel initiatives (doctrine, training, TTP). Execute the OPSDEPS/Director JS J-6 approved Joint Terminal Attack Controller (JTAC), Forward Air Controller-Airborne (FAC-A), and Joint Fires Observer (JFO) Memorandums of Agreement—which standardize schoolhouse curriculums; training materials and equipment; simulation and simulators; and instructor requirements. Conduct JFS ESC standardization team accreditation visits to US and partner nation schoolhouses to ensure MOA signatories are accomplishing schoolhouse training in compliance with the Memorandums—reporting results to the JFS ESC and FOGO-level Commander that include deviations from the MOAs; recommendations for improvement, and best practices. Pursue Digitally Aided Close Air Support (DACAS) implementation testing and documentation to provide the ability to digitally transmit instructions (9-line and digital target marking) to expedite attack execution and reduce the potential for friendly-fire by lessening the possibility for human translation error and increasing the opportunity for target confirmation between the JTAC and the attacking aircraft crew. Continue to support Combat Identification Server operational execution in CENTCOM theater of operations while transitioning to gaining Service.</p> <p>Update the C2OTM Reference Architecture and add additional analysis and architectures. Continue to analyze JCIDS Capability Documents, ISPs and TISPs. Review and analyze NR KPP architectures, KPPs, KSAs and capabilities for interoperability and integration. Provide NR KPP Waiver Recommendations based on GIG connection and operational / systems requirements analysis. Maintain the Future Mission Network (FMN) / Mission Partner Environment (MPE) Integrated Architecture. Support C4/CYBER FCB on JROC Interest issues with analysis and architectures. Provide additional functions for inclusion in the Joint Common System Function List (JCSFL). Provide analysis and architecture support to the Joint Aerial Layer Network initiative. Develop the Joint Information Environment (JIE) ICD Architectures. Analyze and provide recommendations for the JIE Reference and Solutions Architectures. Support the Federation effort with capabilities requirements to proposed capabilities and capability gaps analysis using authoritative sources of information and data. Develop Solutions architectures and perform analysis to determine capability development priorities, identify capability redundancies/gaps, and identify critical Joint C2 interoperability opportunities and requirements.</p> <p>Begin development of six new Tier 1 JMTs based on JROC and FCB guidance and partnership opportunities. Support cross-DoD efforts to enhance the capability to collaborate on, leverage and improve developed and developing JMTs. Support the management of the DACAS Change Control Engineering Change Proposal (ECP) implementation with Program Managers and Mission Partners. Manage the Joint Fires Support JMT in support of the JROC mandated analyses, implementing the ECPs identified in the analysis conducted in FY-2012/2013. Provide JMT data via web-enabled portal capability providing operational</p>

context and mission-based data reuse for the testing, training, programming, program development, experimentation, and modeling and simulation communities of interest across DoD.				
Provide architecture and capability analysis support for joint Command & Control (C2) systems and Service systems joint integration in support of the Combat Capability Development. Provide architecture analysis and products in support of the development of C2 related ICDs (Initial Capabilities Documents), CDDs (Capability Development Documents), CPDs (Capability Production Documents), ISPs (Information Support Plans) and TISPs (Tailored Information Support Packages) for compliance with the JCIDS process.				
Provide the capability to support use of architecture data in Joint Staff and OSD capability analysis processes. Provide and expand the development of web services and standardized portal interface for exposure and federation of Joint Mission Threads, C/S/A Architectures, and other authoritative sources of data. Provide an Integrated Dictionary of authoritative WMA architecture elements for reuse by programs and other capability developers. Incorporate and align joint architecture development environment with data model and methodology standards in conjunction with OSD, Joint Staff, and Service and Combatant Command communities. The result of the enhanced Federation capabilities will be the increased efficiency of architecture development through discovery access and reuse and the increased effectiveness through the greater availability of authoritative products.				
<b>FY 2014 Plans:</b>				
Develop an integrated and prioritized C2 capabilities action plan to address C2 capability shortfalls for JS J6 endorsement and signature. Lead implementation efforts necessary to continue to evolve the DoD FMN / MPE capability IAW with JROCMs 081-12 and 026-13. Develop a Joint C4I Partnership to establish and manage a predictable and operationally realistic environment for capability development, assessment, test, and certification of COCOM and JTF C4I systems. Assess and test systems providing capabilities to joint missions in the expected operational environment and verify interoperability earlier in the development cycle to enhance the effectiveness and efficiency of joint and coalition force C4I assessment, test and certification. Provide real time support for urgent COCOM and coalition requirements, JCS exercises, contingencies and current ops. Additionally, continue to provide oversight and management of FY14 joint combat development projects and integration activities. Provide recommendations to inform JROC and DOD executive level C4/Cyber capability trade-off, investment and divestiture decisions impacting FY16.				
Continue the prioritization and sequencing of C2 capabilities via the USD(AT&L)-sponsored Joint C2 Sustainment and Modernization Plan process, with follow-on C2 capability production, integration, fielding and sustainment for FY14-16. Continue to perform the Operational Impact and Risk Assessment of Joint C2 capabilities based on COCOM and Service inputs. Direct engagement with Component materiel developers to shape solutions and ensure requirements traceability through product

<b>APPROPRIATION/BUDGET ACTIVITY</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide</i> BA 7: <i>Operational Systems Development</i>		<b>R-1 ITEM NOMENCLATURE</b> PE 0607828J: <i>Joint Integration &amp; Interoperability</i>		
<b>C. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
<p>delivery. Continue the sustainment and utilization of the NRID and DST to provide accessibility and visibility into C2 capability needs, defined requirements, and potential C2 solutions. Provide funding strategies to decision-making forums that support sustainment of current capabilities while continuing to migrate C2 to an agile, services-oriented environment. Continue to develop JCIDS and requirements documents to sustain the Joint C2 family of programs and lead the way for future joint C2 capability development. Continue to develop requirements for Future Mission Network (FMN) / Mission Partner Environment (MPE) capabilities and consider C2 DOT_LPF-P solution tradeoffs and recommendations. Develop and/or collaborate on CDPs for Unit Command and Control and access to Intelligence, Surveillance and Reconnaissance Collection Management information. Develop CPs for Global Force Management Synchronization, and Course of Action Development, and collaborate on the Command and Control Air Operation Services CP.</p> <p>Transition the C2 Core data exchange standard to the National Information Exchange Model (NIEM) and stand up the NIEM Military Operations Domain. Provide training and support to NIEM implementation activities within the Warfighter Mission Area (WMA) to promote DoD and interagency interoperability. Support DoD CIO efforts to refine and implement the DoD Data Framework and lead the implementation of the DoD Data Framework within the WMA. Continue to lead the NATO C3 Board Information Integration Services Capability Team and define a NATO Core Data Framework to facilitate data sharing capabilities with NATO nations. Execute FY 2014 Authoritative Data Source (ADS) Annual Review Board in conjunction with the Joint C2 Sustainment and Modernization Plan process to synchronize data exposure with capability development. Continue to verify C2 ADS information in the DoD Enterprise ADS Registry and report ADS exposure and utilization metrics. Lead, facilitate, and/or support NIEM and other relevant WMA Data Standard implementation and technical demonstrations/pilots to enhance US and coalition data interoperability. Continue providing data &amp; service strategy reviews and recommendations for ISPs/IAPs, capabilities development documents, and guidance and policy documents to ensure programs are complying with warfighter requirements and policy. Stand up the WMA Data and Services Steering Committee to provide a formal process to establish WMA data sharing priorities and standards for WMA capabilities. Maintain oversight of DOD's tactical information exchange standards.</p> <p>Continue to lead interoperability efforts across DOD and partner nations at operational and tactical level for mission partner operations, fire support, Combat Identification (CID), and Friendly Force Tracking (FFT) capabilities. Continue to function as Secretariat for the JROC-chartered, FOGO-level Joint Fire Support (JFS) and CID/FFT Executive Steering Committees (ESCs). Execute the JFS/Joint Close Air Support (JCAS) and CID-FFT Action Plans to fulfill JFS and CID/FFT responsibilities. Execute the Joint Staff-approved Bold Quest 2014 assessment demonstration. Continue to expand the JROC-directed JFS Joint Mission Thread beyond the "execution phase" to the entire fires support process. Continue to execute OPSDEPS/Director JS J-6 approved Joint Terminal Attack Controller (JTAC), Forward Air Controller-Airborne (FAC-A), and Joint Fires Observer (JFO) Memorandums of Agreement. Continue to conduct JFS ESC standardization team accreditation visits to US and partner nation schoolhouses to ensure MOA signatories are accomplishing schoolhouse training in compliance with the Memorandums.</p>

<b>Exhibit R-2, RDT&amp;E Budget Item Justification:</b> PB 2014 The Joint Staff		<b>DATE:</b> April 2013		
<b>APPROPRIATION/BUDGET ACTIVITY</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide</i> BA 7: <i>Operational Systems Development</i>		<b>R-1 ITEM NOMENCLATURE</b> PE 0607828J: <i>Joint Integration &amp; Interoperability</i>		
<b>C. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
Continue DACAS implementation testing and documentation to provide the ability to digitally transmit instructions to expedite attack execution and reduce the potential for friendly-fire.				
Continue to analyze NR KPP architectures and capabilities for interoperability and integration, and provide NR KPP Waiver Recommendations based on operational / systems requirements analysis. Continue to maintain the Future Mission Network (FMN) / Mission Partner Environment (MPE) Integrated Architectures and Joint Information Environment Architectures. Develop solutions architectures for the Warfighting Enterprise Architectures. Support C4/CYBER FCB on JROC Interest issues with analysis and architectures. Provide additional functions for the Joint Common System Function List. Review emerging DoD policy addressing architectures and standards. Continue to support FCB architecture-based analysis requirements through expanding the architecture federation effort, to include the capability to provide discovery and reuse of capabilities requirements to proposed capabilities traceability and capability gaps analysis reports using authoritative sources of information and architecture data.				
Continue development of new Tier 1 JMTs based on JROC and FCB guidance and partnership opportunities. Identify future Joint Fires Support (JFS) Block ECPs. Provide JMT data via web-enabled portal capability providing operational context data reuse for the testing, training, programming, and program development.				
Provide support to the Joint Staff J6 Combat Capability Development Division (CCDD) by conducting architecture analysis and developing DoDAF products that support the Joint C2 requirements development process and the DoD Sustainment & Modernization Planning process (SMPP) to enable gap analysis and solution identification. Provide Joint C2 architecture data via federated capability providing operational context and C2 mission-based data reuse for the testing, training, programming, program development, experimentation, and modeling and simulation communities of interest.				
Continue to expand the amount and quality of Warfighting Mission Area (WMA) architecture data available to support DoD CIO architecture requirements and Joint Staff capability analysis, test and evaluation, and modeling and simulation processes. Improve capability for discovery, accessibility, and use/re-use of WMA and Joint Information Environment architectures, architecture-based analysis reports and associated data. Continue to expand the federated architecture environment to include Combatant Command, Service, and Agency (C/S/A) partner repositories of authoritative architecture information and data.

<b>Exhibit R-2, RDT&amp;E Budget Item Justification:</b> PB 2014 The Joint Staff		<b>DATE:</b> April 2013		
<b>APPROPRIATION/BUDGET ACTIVITY</b> 0400: <i>Research, Development, Test &amp; Evaluation, Defense-Wide</i> BA 7: <i>Operational Systems Development</i>		<b>R-1 ITEM NOMENCLATURE</b> PE 0902298J: <i>Management Headquarters</i>		
<b>C. Accomplishments/Planned Programs (\$ in Millions)</b>		<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>
workflow support affecting military operations in support of the JCS. JSIN improves actions processing for faster coordination of critical issues with CCMDs, Services, and agencies, as well as within the Joint Staff.				
<b>FY 2012 Accomplishments:</b> Established independent government cost analysis; enhanced cost controls for \$21M IT projects – cutting overruns by 15%. Consolidated software licensing process between Pentagon and Hampton Roads, reducing additional contract overhead and gaining renewal cost efficiencies with centralized management and consolidated procurement. Established a framework for a JS-wide robust Portfolio Management process, integrated with organizational processes, to enhance senior leaders' JS-wide IT investment oversight, decision-making and ability to improve strategic alignment with JS mission & vision, enterprise initiatives and DoD Business Efficiencies guidance. Led DoD as five person member of the DISA mobility pilot – Testing five iPhones; first testers to request an organizational account. Led Windows 7 migration on an accelerated schedule; reduced security risks by 40%. Prioritized and led IT analyses for multiple JS initiatives such as: Thin Client (S/U), DISA Enterprise Content Management Services (DECMS/U), Desktop Server and Application virtualization, Mobile Computing, and the JS-ITA Service Desk Consolidation effort, which guaranteed C4ISR support to the joint force while providing resource efficiencies and improved network security posture.				
<b>FY 2013 Plans:</b> Provide planning and support to Joint Staff Information Technology initiatives, including planning and letter estimates for DECC migration for JS applications, Thin Client (S) and the VDI proof of concept, Defense Enterprise Email (DEE) (S), Defense Enterprise Portal Services (DEPS) (U), Desktop, Server and Application Virtualization (S), Cross Domain Services IOC, DISA Enterprise Content Management (DECMS) (U), Mobile Computing solutions, Unified Communications Capabilities, Enterprise Services Implementation and Joint Information Environment (JIE) planning, JS Service Desk optimization plan, and Identity and Access Management capabilities to achieve efficiencies, improve mission effectiveness, and strengthen our security posture. Research, analyze, architect, plan the transition to, and support the sequencing and dependencies for this portfolio of Core IT investments as well as Mission systems within the Joint Staff.				
<b>FY 2014 Plans:</b> Provide planning and support to Joint Staff Information Technology initiatives, including continued Defense Enterprise Computing Center (DECC) migration for JS applications, Thin Client (U) and Mobile Computing, Defense Enterprise Portal Services (DEPS) (S), continue Application Virtualization (S) and (U), Cross Domain Services FOC, DISA Enterprise Content Management (DECMS) (U) optimization and integration, Mobile Computing solutions, Unified Communications Capabilities transition to VOIP/VoSIP, Enterprise Services Implementation including Enterprise Task Management (U/S), JS Service Desk optimization
